We have developed a reputation in the trade for supplying the highest quality tempered glass. Absolute attention to detail in production, packing and quality control mean clients can be assured of consistency of top quality products.

GLASS FACTORY

All steps in production process reach the highest quality levels

FLOAT GLASS

- All glass is processed from the same float glass supplier
- Quality and die batch of glass remains consistent
- Strict quality checks to ensure only conforming float glass is processed

DOUBLE EDGE POLISHING MACHINES

- Perfect polish and blemish free edges
- Horizontal double edge polishing machines give the finest edge finish
- Speed of glass through edging machine is monitored
- Quality control personnel check each sheet of glass
- Sophisticated water filtration system ensures clean water is used during polishing

TEMPERING OVEN

Toughened glass is made from annealed glass via a thermal tempering process. The glass is placed onto a roller table, taking it through a furnace that heats it above its annealing point of approx 700°C. The glass is then rapidly cooled with forced air drafts. Of critical importance in glass processing is the tempering furnace used.

- Furnace can toughen up to 2440mm x 3600mm glass
- Specially designed furnace for heavy glass –
 Optimally toughens 8mm thick and above
- On-site mechanic ensures regular maintenance
- Punch testing of toughened glass every hour as per Australian Standards

TESTED & CERTIFIED

Our 6mm, 8mm, 10mm, 12mm & 15mm glass is tested and certified as complying with the requirements of Australian & New Zealand Standard 2208:1996 – Safety Glazing Material in Buildings.

DETAILED QUALITY CONTROL

At each stage of production (cutting, polishing, drilling, tempering and packing) dedicated Quality Control Personnel inspect each sheet of glass. Glass identified as not conforming to the highest quality standards is set aside.

Random sampling of glass is undertaken to ensure compliance with detailed quality assurance specifications relating to glass surface finish, edge finish, labelling identification, packing specification and the like. Quality assurance reports are provided to us and the factory to ensure the highest standards are continually achieved and monitored.

Full ERP system implemented with each sheet barcoded: records kept to show exact time glass processed at each step of production = industry leading manufacturing.

GASP testing machine: MEASURING SURFACE STRESS IN TEMPERED GLASS to ensure optimal tensile surface strength. Testing with the GASP machine allows optimisation of furnace settings; ensures conformance to specifications and avoids under or over-stressing glass.

ATTENTION TO DETAIL IN PACKING

At the packing stage of production, all glass panels pass through purpose built inspection racks where there is a 100% QC check to ensure only glass panels that conform to strict requirements of edge work, flatness, squareness, perfect radius corners and a range of further detailed specifications are allowed to be packed.

We're serious about quality, seriously

Pool fencing glass is Grade "A" standard and proudly displays the Global Mark certified product mark.

We are authorised to display the Global Mark product conformance mark as confirmation that the manufacturing process is able to consistently produce glass in compliance with AS/NZS 2208: 1996 Safety Glazing Materials In Buildings.

TAKING THE EXTRA STEPS

In addition to Global Mark conformance, we retain the services of SGS. SGS is internationally recognised as the leader for inspection, verification, testing and certification with 90,000 employees and 2000 offices globally.

We have retained SGS to review and audit factory compliance to detailed production requirements as set out by Global Mark in conjunction with requirements of AS/NZS 2208:1996.

Companies globally rely on SGS for independent third-party inspections, testing and auditing solutions to ensure products, services and processes comply with the latest quality standards.

The combined efforts of a world leading production facility, Global Mark conformance and independent auditing by SGS ensure we supply industry leading quality.

12MM TOUGHENED GLASS

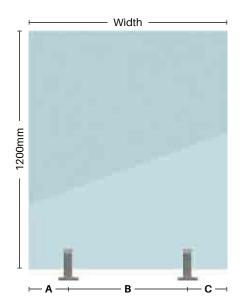

Our large range of 12mm thick clear toughened glass pool panels allows you to select an installation configuration to cover nearly all frameless situations

50mm increments from 200mm to 2000mm

Panels are produced under strict quality conformance requirements which has led to our recognition as the industry leading supplier

8MM MASTER RANGE GATE PANELS

We offer 4 widths of 8mm clear toughened pool gate panels. The gates may be used to hinge from glass hinge panels or adjacent walls or posts. Holes are predrilled in gates to match Master Range hardware. Polaris 155 Series soft close hinges also suit hinge hole positions

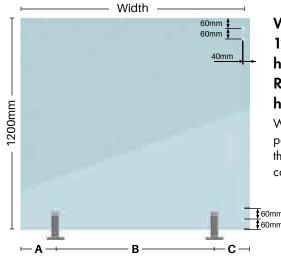

8mm thick glass gates are lighter than 10mm or 12mm thick glass gates which leads to less wear and tear on gate hardware over the long term.

Glass to wall/post	12PWG-0900	C12PWG-0900	900mm	1200mm	1.08	32kg

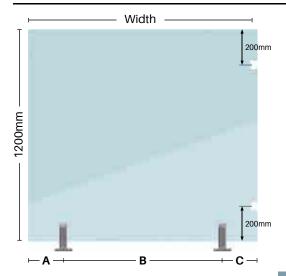

We offer 2 widths of gates to suit Soft Close hinges.

Polaris 125 Series & Atlantic 530 series hinges are specially designed with a soft close action to take the weight of a 12mm thick glass gate.

The depth of the glass cut outs differ between the wall/post hinge gate and the glass to glass gate. A deeper hinge cut out is required for the wall/post glass gate, which is why two gate types are offered.

12mm thick clear toughened
5mm radius corners
Suits Polaris 125 series or Atlantic 530 series hinges
2x hinge cut outs

12 MM RETAINING WALL PANELS

To be compliant to pool fencing requirements, raked panels may be needed.

Our raked panels are higher at one side of the glass which enables step points or changes in height to be overcome. We have 1200mm wide panels with 5 heights available. The modular raked panels are a large cost saving versus custom made raked glass and also enable jobs to be completed immediately.

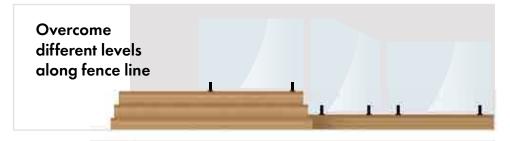

Please take care to refer to relevant Standards to ensure our raked panels are suitable for your needs as each installation situation/compliance requirement is unique.

12 MM CLEARGLAZE GLASS

For the minimalist look, Clearglaze glass is an ideal solution. Glass is grouted directly into the ground which removes the need for spigots. When preparing for new concrete pours, a slot can be left into which glass panels are inserted and then grouted in. For existing concrete areas, suitable concrete cutting can provide the required slot. Glass is 1350mm high to ensure the top of glass remains at 1200mm or more above finished floor level. Refer page 81.

Clearglaze glass is also commonly used for side fix spigot installations. Once installed the 1350mm high glass remains at 1200mm above floor level.

12 MM CLEARGLAZE GLASS

To complement the Clearglaze panel range, a 1000mm wide hinge panel is available to suit the Master Range and Polaris or Atlantic soft close hinges. The hinge panel may be used in conjunction with multiple gate sizes to achieve your desired configuration. Refer to pages 55-75 for general hardware installation details.

The world's leading glass treatment

Ultimate protection

Optically clear, UV stable, chemical resistant, water and oil repellent

Reduces maintenance costs

EnduroShield keeps glass visibly cleaner for longer and reduces the frequency between cleans

Highly durable

Permanently bonds to the glass and comes with a true 10 year performance warranty*

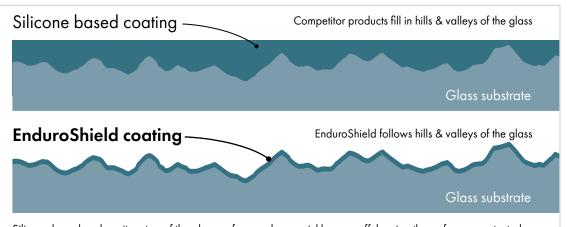

From balustrading to pool fencing, high rise and domestic glazing, shower screens and insulated glass units, EnduroShield is the smart choice for glass

Add value to your glass sale and increase your profit!

A permanent* coating that is both water and oil repellent

Silicone based sealers sit on top of the glass surface and can quickly wear off, leaving the surface unprotected. EnduroShield follows the hills and valleys of the glass, forming a strong, permanent bond that does not flake or peel.

Testing and certification

*EnduroShield's performance has been independently tested by one of the leading global testing and certification houses, TÜV Rhineland in Germany for durability, easy-clean functionality, safety and quality. Testing was carried out to simulate a lifetime of 10 years on glass for both interior and exterior use, and EnduroShield passed all tests.

Untreated

· Easy to clean · Durability tested

How to place your EnduroShield order

We now offer an EnduroShield coating service in-house, applied by fully accredited and specially trained staff

Purchase our EnduroShield coating service as an optional extra on your next order!

This service can be purchased for job lot orders from all glass ranges available, including project orders.

Step 1

Place order for glass as normal

Step 2

Specify EnduroShield coating required

We have a FREE excel calculator which provides instant pricing.

Contact us for your copy

Step 3

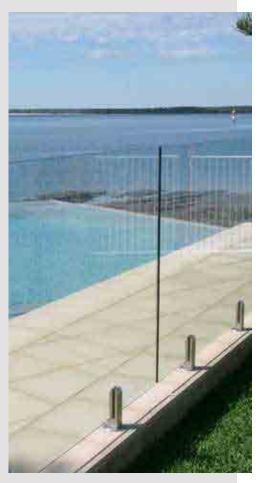

We will provide you with a sales order confirmation of pricing with EnduroShield coating

Step 4

We will apply EnduroShield coating on both sides of glass in your order. Once coating has cured, glass will be despatched (pick-up, delivery or freight as required)

Friction spigot range

Our commitment to quality and compliance means we supply carefully designed products, keeping in mind both appearance and also Australian Standards' load requirements. Each product range is vigorously tested for material composition (compliance to stainless steel composition for example).

Our large range of spigots and finishes ensures a product selection is possible for all install situations.

- Duplex stainless steel 2205
- Polish, satin or matt black finish
- Recessed friction plate for ease of installation
- · Single friction
- Specifically designed for pool fence load requirements at an incredible price point

POOL MADRID SS2205

Designed specifically for pool fencing load requirements, the Madrid pool spigot range is the ultimate in quality at an unbelievable price point.

Pool Madrid core drill spigot

FRICTION FIT

Polish, satin or matt black finish

Order Code:

Core drill: POOLMAD-S-P (Polish)
POOLMAD-S-S (Satin)
POOLMAD-S-B (Matt Black)

- Duplex stainless steel 2205
- Designed for pool fencing load requirements while keeping price point in mind
- Contemporary tapered top to comply with 'no toe hold' requirements
- Use with standard Madrid dress rings and domical cover
- 45mm front profile
- Earthing terminal included
- Recessed friction plate provides a neat finish and easy installation
- M10 bolt at bottom of core drill spigot allows for height adjustment and adds extra anchoring strength

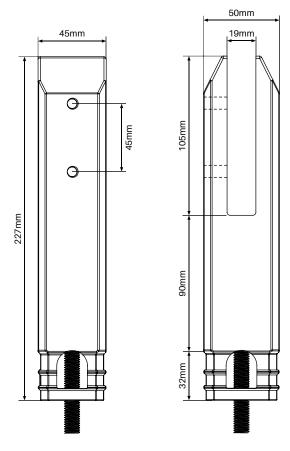

Handy earthing terminal on core drill & base plated spigots

Optional extras

Flat dress ring

100mm x 100mm Polish, satin or matt black finish

Order Code:

MAD-DR-P

MAD-DR-S

MAD-DR-3

Raised dress ring

100mm x 100mm Polish, satin or matt black finish

Order Code:

MAD-DR-RAISED-P

MAD-DR-RAISED-S

MAD-DR-RAISED-B

Trade tip

Raised dress rings are helpful if grout in the core hole sets slightly above ground level. The slightly tapered finish of the dress ring overcomes this issue.

POOL MADRID SS2205

Pool Madrid base plated spigot

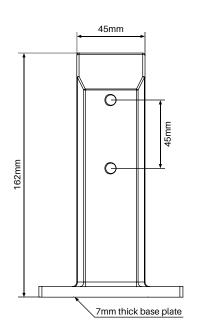

FRICTION FIT

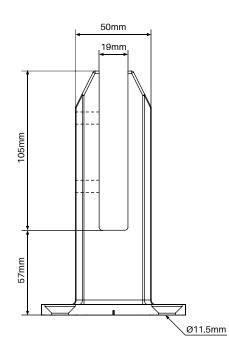

Polish, satin or matt black finish Order Code: POOLMAD-SBP-P (Polish) POOLMAD-SBP-S (Satin) POOLMAD-SBP-B (Black)

- Duplex stainless steel 2205
- Contemporary tapered top to comply with 'no toe hold' requirements
- Base plate has 4x countersunk holes to enable flush fixing. Countersunk timber screw available (hex head drive)
- Modern square shape with minimal visible fixings
- Recessed single friction plate for neat finish & easy installation
- Tapered packer included (1mm to 1.5mm) to enable tilt adjustment of glass

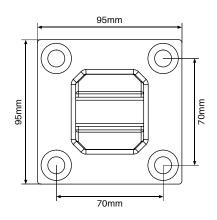

See page 52 for convenient timber & concrete fixing kits for base plated installs

MADRID POOL EXTENDED SS2205

The Extended Pool Madrid spigot is ideal where extra depth is required for core drilling – for example, core drilling through pavers to concrete below.

extended body

Madrid pool spigot

FRICTION FIT

Polish, satin or matt black finish

Order Code: POOLMAD-EXT-S-P (Polish)
POOLMAD-EXT-S-S (Satin)
POOLMAD-EXT-S-B (Black)

- Duplex stainless steel 2205
- Designed for pool fencing load requirements while keeping price point in mind
- · Ideal where deeper core drilling is required
- · Use with standard madrid dress rings
- · 45mm front profile
- Earthing terminal included
- Recessed friction plate provides a neat finish and easy installation
- 285mm long plus M10 height adjustment bolt

Optional extras

Flat dress ring

100mm x 100mm Polish, satin or matt black finish

Order Code:

MAD-DR-P

MAD-DR-S

MAD-DR-B

Raised dress ring

100mm x 100mm Polish, satin or matt black finish

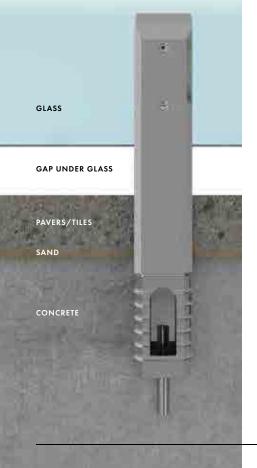

Order Code:

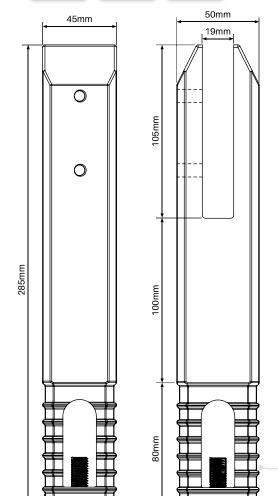

MAD-DR-RAISED-P

MAD-DR-RAISED-S

MAD-DR-RAISED-B

Installation example

Trade tips

Raised dress rings are helpful if grout in the core hole sets slightly above ground level. The slightly tapered finish of the dress ring overcomes this issue.

With an overall height of 285mm plus an added height adjustment bolt, the extended pool madrid range is ideal where extra depth is required for core drilling

Stainless steel 2205 is a superior duplex stainless steel which features elevated levels of chemical components enabling superior strength and corrosion resistance in harsh marine environments. The Madrid range has been designed with superior strength and a slimline profile.

Core drill spigot

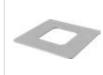

FRICTION FIT

Polish, satin, matt black or matt white finish

Order Code: MAD-S-P (Polish) MAD-S-S (Satin) MAD-S-B (Black) MAD-S-MW (White)

- · Duplex stainless steel 2205 designed for superior strength
- Square shape with minimal visible fixings
- Modern 45mm front profile
- M10 bolt at bottom enables up to 60mm of vertical height adjustment, a contact point for earthing, and extra anchoring in footings (helpful when working with sand)
- · Recessed single friction plate for neat finish & easy installation
- Tapered packer included (1mm to 1.5mm) to enable tilt adjustment of glass

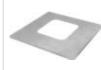

Optional extras

Flat dress ring

100mm x 100mm outer Polish, satin, matt black or matt white finish

Order Code: MAD-DR-P MAD-DR-S MAD-DR-B MAD-DR-MW

Raised dress ring

100mm x 100mm outer Polish, satin or matt black finish

Order Code: MAD-DR-RAISED-P MAD-DR-RAISED-S MAD-DR-RAISED-B

Raised dress rings are helpful if grout in the core hole sets slightly above ground level. The slightly tapered finish of the dress ring overcomes this issue.

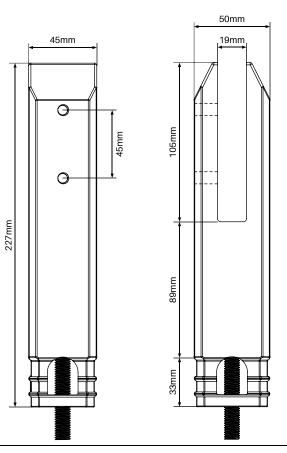

Highest quality finish

The Madrid matt black spigots use genuine Akzo Nobel textured powder to provide the highly sought after matt black finish.

To ensure proper adhesion of powder to stainless steel, a special pre-treatment is undertaken whereby a thin, zirconium based conversion layer is applied to the stainless steel substrate. This special coating provides robust corrosion protection and enhanced paint adhesion.

MADRID RANGE SS2205

The friction plate in the Madrid Range has been specially designed to provide maximum clamping action on the toughened glass. A stainless steel plate is moulded into the friction plate which is the entire width & height of the spigot mouth. This ensures maximum distributed clamping action.

Base plated spigot

FRICTION FIT

Polish, satin or matt black or matt white finish

Order Code: MAD-SBP-P (Polish)

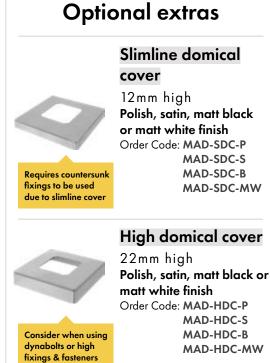

MAD-SBP-S (Satin)

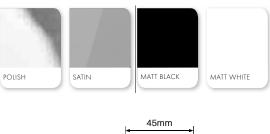

MAD-SBP-B (Black)

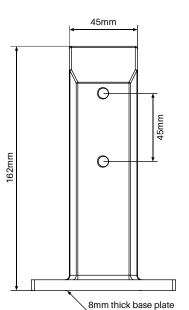

MAD-SBP-MW (White)

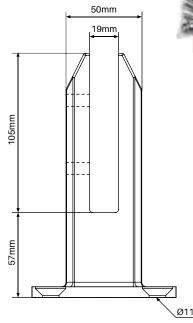

- Duplex stainless steel 2205
- Contemporary tapered top to comply with 'no toe hold' requirements
- Base plate has 4x countersunk holes to enable flush fixing. Countersunk timber screw available (hex head drive)
- Modern square shape with minimal visible fixings
- Recessed single friction plate for neat finish & easy installation
- Tapered packer included (1mm to 1.5mm) to enable tilt adjustment of glass

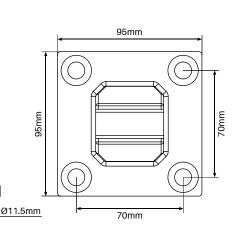

See page 52 for convenient timber & concrete fixing kits for base plated installs

SPIGOT INSULATOR

SUITS MADRID RANGE OF CORE DRILL SPIGOTS:
MADRID, POOL MADRID & POOL MADRID EXTENDED

Earthing of spigots is an important consideration when installing pool fencing. Electrical safety laws and wiring rules contain provisions regarding earthing within 125cm of the pool water edge.

Earthing reduces the risk of an electrical shock should there be an electrical fault. The cost involved of earthing spigots is generally high.

Importantly, earthing contemplates conductive materials. We have designed and patented a spigot insulator which can be sleeved over a stainless steel Madrid core drill spigot whereby it is not possible to touch the metal spigot. In this way, the installed spigot is completely insulated and non-conductive to touch. Materials which are non-conductive do not require earthing.

Silver Gloss

Core drill spigot insulator

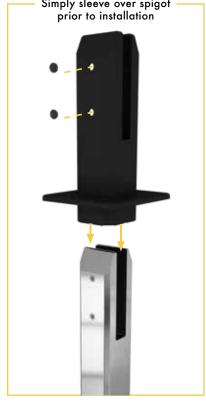

Black, silver gloss or white finish

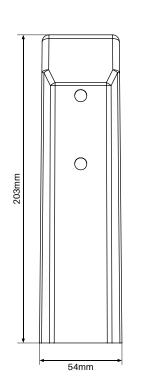

Order Code: MAD-INS-CD-B (Black)

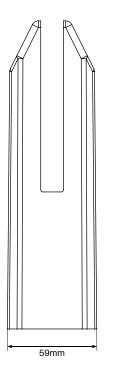

MAD-INS-CD-SG (Silver Gloss)

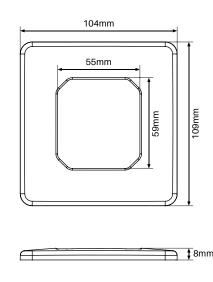

MAD-INS-CD-W (White)

- 1x SPIGOT INSULATOR
- 1x DRESS RING
- 2x FRICTION SCREW COVERS
- Made from ASA thermoplastic excellent weather & chemical resistance and high impact strength
- · Non-conductive material
- Includes 1x dress ring
- Also includes 2x caps which fit into friction grub screw holes
- Simply sleeve over Madrid stainless steel core drill spigot prior to install. Then install glass with spigot as per normal
- Can be retro-fitted to existing core drill Madrid spigots - carefully cut off excess base of spigot insulator to suit required insulator height
- Suitable for use with Madrid core drill spigots (MAD-S or POOLMAD-S)
- Specially designed top section prevents chance of pulling insulating cover away from spigot
- Sold as single unit (Spigot insulator, dress ring & 2x caps)

SPIGOT INSULATOR

SUITS MADRID RANGE OF BASE PLATED SPIGOTS:

MADRID & POOL MADRID

Base plated spigot insulator

Black, silver gloss or white finish

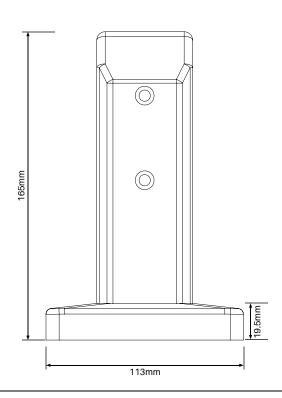

Order Code: MAD-INS-BP-B (Black)

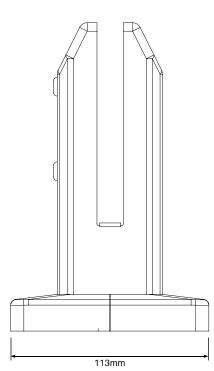

MAD-INS-BP-SG (Silver Gloss)

MAD-INS-BP-W (White)

1x SPIGOT INSULATOR
1x 2-PART DOMICAL COVER
2x FRICTION SCREW COVERS

- Made from ASA thermoplastic excellent weather & chemical resistance and high impact strength
- · Non-conductive material
- Includes 1x vertical spigot stem & 2-part domical cover
- Also includes 2x caps which fit into friction grub screw holes
- Firstly install vertical stem to spigot. Fix off base plate with countersunk fixings to substrate. Install 2 part domical cover.
- Can be retro-fitted to existing base plated Madrid spigots
- Specially designed top section prevents chance of pulling insulating cover away from spigot & base plate
- Sold as single unit (Spigot insulator, 2-part domical cover & 2x caps)
- Suitable for use with Madrid base plated spigots (MAD-SBP or POOLMAD-SBP)

Custom colour

Madrid spigots

Customize our MADRID core drill, base plated and vertical spigots and matching covers with our new release MADRID CUSTOM range.

Select from a large range of DULUX or INTERPON powder coat finishes and create a truly unique frameless pool or balustrade.

Madrid Custom Spigots

Whip blast finish

Order Code: MADCUS-CORED (Core drill)

MADCUS-BASEP (Base plated)

MADCUS-SDC (Slimline domical cover)
MADCUS-HDC (High domical cover)

- · Large range of colours available for job lot powder coating
- · Premium commercial powder coat finishes available
- · Interpon D2525 series
- · Dulux Premium series (Duratec & Electro ranges)
- \cdot Australia's best practice powder coating is followed: whip blast finish, epoxy pimer & then powder coated
- · Suits 12mm glass
- Powder coated at a premium facility in Brisbane with Australia wide delivery*
 *Freight applies to direct shipments
- · For spigot & cover technical drawings refer pages 22, 23 & 28.

LARGE SELECTION OF QUALITY FINISHES

MADRID FACE MOUNT SS2205

Innovative solution for face mounting of glass with no visible fixings. This spigot is ideal for out of ground pools which have a narrow top perimeter. Made from superior Duplex 2205 stainless steel ensuring strength and high corrosion resistance. Glass is positioned above floor line.

Face mount spigot

FRICTION FIT

Polish, satin or matt black finish Order Code: MAD-FACEM-P (Polish) MAD-FACEM-S (Satin) MAD-FACEM-B (Black)

- Duplex stainless steel 2205
- · Slimline 45mm front profile
- Face mount installation no need for core drill or base plated spigots
- 2x M12 fixing nuts included (M12 lag screw or threaded rod sold separately)
- Slotted fixing hole allows for easy positioning of fixings
- Cover plate hides fixings for neat finish
- · Earthing terminal included
- Height adjustment packers and stand offs available – ideal where tile coping protrudes past slab edge
- Friction screws for clamping plate situated on inside of balcony/pool for easy install

See page 119 for our complete range of M12 fixings

Optional extras

Easily overcome height variances

Stackable packer

3 mm thick
Polish, satin or matt
black finish

Order Code: MAD-FACEM-3PKR-P

MAD-FACEM-3PKR-S MAD-FACEM-3PKR-B

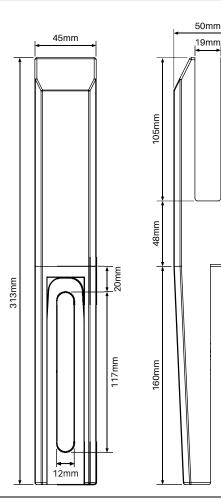

Ideal for use when tile coping is present. Allows for positioning spigot away from edge

Ø38mm standoff

10mm thick
Polish, satin or matt
black finish

Order Code: MAD-FACEM-SO10-P MAD-FACEM-SO10-S MAD-FACEM-SO10-B

MADRID VERTICAL SS2205

Stylish and cost effective face mount spigot solution into timber or concrete

50mm

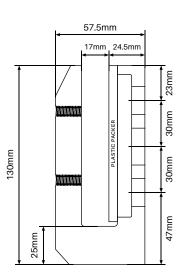

Madrid Vertical spigot

FRICTION FIT - WALL MOUNT CLAMP

Polish, satin or matt black finish

Order Code: MAD-VC-P (Polish) MAD-VC-S (Satin)

- MAD-VC-B (Black) · Stainless steel 2205 in polish, satin and
- matt black finish · Face mount spigot can be fixed to concrete, timber, beams or bearers
- · A fast and easy alternative to glass standoffs
- Suits 12mm glass friction fit
- · Ideal for narrow concrete slab installations with single central fixing
- Earthing terminal included for installations near waters edge
- · Pool fencing compliant. Contact us for load test reports
- Glass tilting HDPE packer tapered from 0.8mm to 1.3mm included to assist installation
- · Eccentric rear bush included allows for vertical and horizontal adjustment when installing
- · Fixing kits sold separately

Fixing kits & accessories

Madrid Timber/beam fixing kit

Order Code: MAD-M12KIT

- · 2 x flat washers & 2 x spring washers
- 2 x nuts
- 1x 6.5mm thick packer
- M12 lag screw sold separately

See page 119 for our complete range of M12 fixings

Madrid Concrete fixing kit

Order Code: MAD-M18KIT

- Suits installation into concrete
- · Use appropriate chemical anchor
- 1 x M18x120mm threaded rod
- 1 x flat washer & 1 x spring washer
- 1 x nut
- 1 x 6.5mm thick packer

48

POLISH

Madrid Packers

Order Code: MAD-VC-PKR-4PK

- · Use on an uneven wall. Packer fits between wall and spigot to pack out
- 2.5mm thick black HDPE
- · Stackable (provides increments of 2.5mm)
- Horse shape allows easy insertion
- Pack of 4

Madrid Adjustable **Angle Packers**

Order Code: MAD-VC-PKRADJ-4PK

- Tapered packer from 1.5 mm to 2.5 mm
- · Allows tilt adjustment. Packer fits between wall and spigot
- Tilt packer can be installed at top or bottom of spigot - allows spigot tilting inwards or outwards
- Black HDPF
- · Stackable (provides increments of 1.5mm)
- · Horse shape allows easy insertion
- Pack of 4

Soudafix CA1400 Chemical anchor 280mL

Order Code: SOUD-CA1400

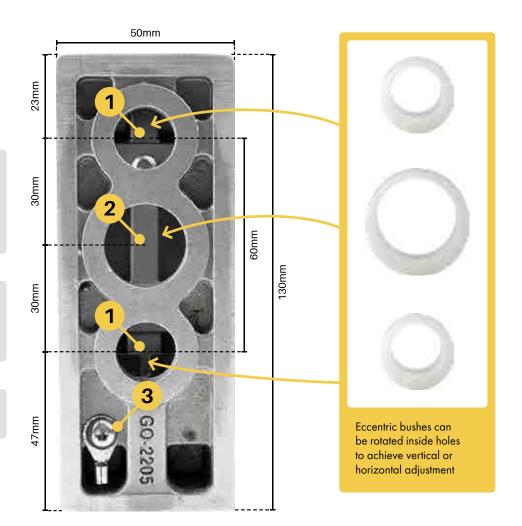

- · High performance, two-component chemical anchoring resin for the pressure-free securing of anchoring rods, studs, treaded collars etc
- · Easy to use and apply
- · Fast cure (20°C=45min full cure; 30°C=25min full cure)
- Vinylester styrene free
- · Can be used in damp concrete
- · Apply with standard caulking gun

MADRID VERTICAL SS2205

Madrid vertical dimensions and install features

- 1 Top and bottom hole use with M12 lag screws or threaded rod for timber or joist fixing. Spigot comes with eccentric bush which allows adjustment up/down and sideways when installing
- 2 Middle hole for concrete/slab installations comes with eccentric bush which allows adjustment up/down and sideways when installing
- **3 Earthing terminal** provided for installations near water's edge

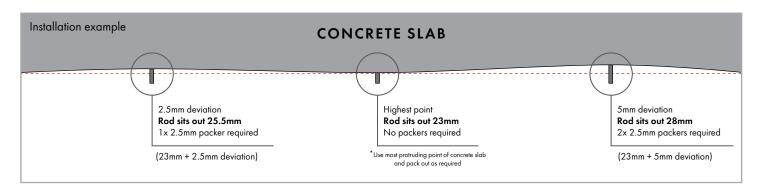

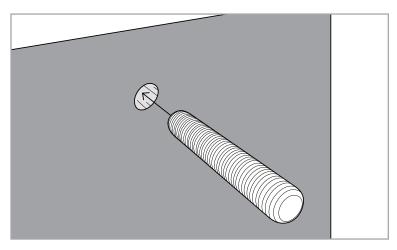

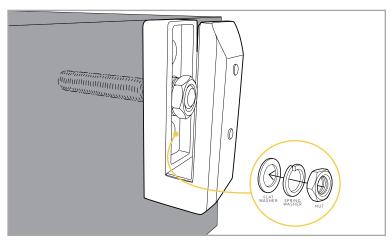

MADRID VERTICAL CONCRETE INSTALL GUIDE

NOTE: Attach a stringline to the concrete surface from where the first clamp is being installed to where the last clamp is being installed and note any variance in slab deviation. Refer to below example for further information.

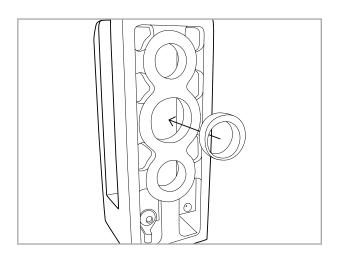

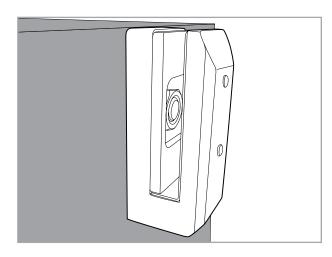

3 Slide spigot with offset washer onto threaded rod and tighten nut over flat washer and spring washer.
(Nut requires 26mm open ended ring spanner to tighten)

Insert offset washer into centre hole on the back of the spigot. Discard other offset washers.

The offset washer can be rotated inside centre hole to achieve vertical or horizontal adjustment.

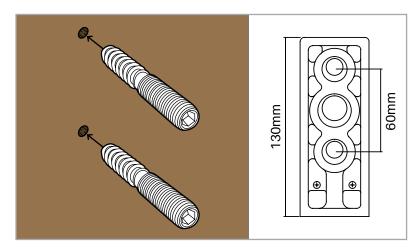

Take 6.5mm packer with centre cutout, remove 2x pieces of double sided tape and fit inside throat of spigot over threaded rod.

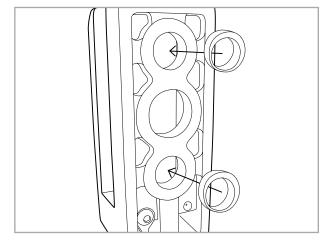

MADRID VERTICAL TIMBER INSTALL GUIDE

NOTE: Attach a stringline to the timber surface from where the first clamp is being installed to where the last clamp is being installed and note any variance in timber deviation. Refer to below example for further information.

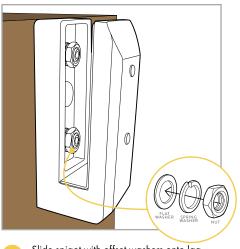

Pre-drill 2x pilot holes into timber where spigots will be installed (hole centres are 60mm).

Drive 2x M12 lag screws into pilot holes and ensure thread is sitting out from the timber 23mm (or as required subject to diagram above).

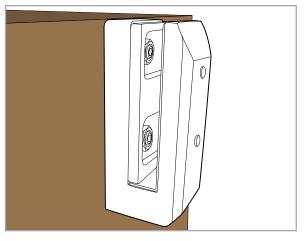

Insert 2x offset washers into top and bottom holes on the back of the spigot. Discard large offset washer.

The offset washers can be rotated inside top and bottom holes for vertical or horizontal adjustment.

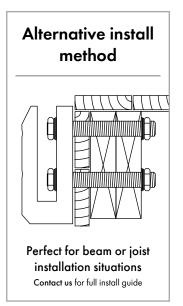

Slide spigot with offset washers onto lag screws and tighten nuts over flat washers and spring washers

(Nut requires 19mm open ended ring spanner to tighten)

Take 6.5mm packer with 2x top and bottom cutouts, remove 2x pieces of double sided tape and fit inside throat of spigot over 2x lag screws with nuts.

*Please consult your engineer relating to questions of concrete suitability for installations as hardness of concrete may vary. For chemical anchor, refer to the manufacturer's specification of minimum embedment of anchor and hole diameter as specifications may differ between manufacturers.

We are unable to give technical advice regarding substrates.

MADRID TILT SS2205

Innovative face mount spigot featuring tilt adjustment – ensures easy alignment of glass

Stackable packer

BLACK HDPE 3mm thick Order Code: MAD-TILT-PKR

Fits between wall/beam and rear plate to overcome uneven surfaces. Horseshoe shape design allows easy installation

Madrid tilt spigot

EASY TILT ADJUSTMENT

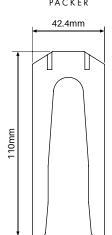

Innovative design – M8 pointed grub screw in top and bottom of spigot pushes onto 45 angle of rear plate allowing front spigot to tilt forward or back.

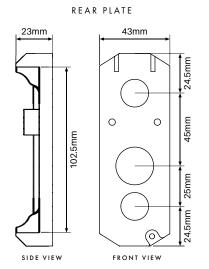

> TILT GLASS BACK

Unwind top M8 grub screw slightly and tighten bottom M8 grub screw to tilt glass back

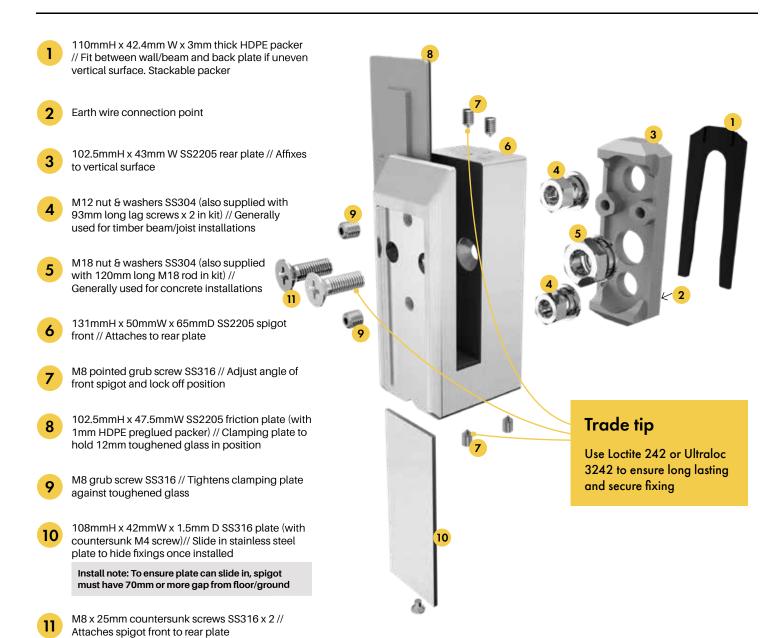

TILT GLASS FORWARD

Tighten top M8 grub screw and unwind bottom M8 grub screw slightly to tilt glass forward

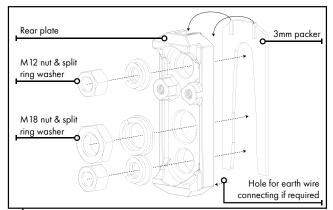

MADRID TILT SS2205

Images & drawings are not to scale

MADRID TILT ADJUSTMENT INSTALLATION

Secure the rear plate to substrate. Ensure rear plate installed with word 'TOP facing upwards.

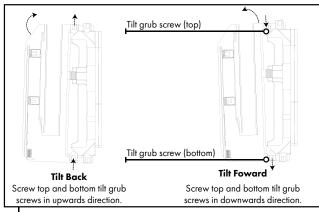

Use appropriate fixing depending if steel, concrete, timber or other substrate.

Fix rear plate using either (a) top & bottom holes with M12 rod/lag screw or (b) middle hole with M18 rod. Do not fix using all 3 holes.

Multiple 3mm packers may be used to space rear plate from mounting wall in cases of over hanging lips etc.

For the M18 and M12 holes, plastic bushes are provided. For each type, select between an offset bush and standard round bush. The offset bush can be rotated for height adjustment.

Install Note: Central M18 rod to be used only for pool fencing. For balustrate installation always use $2 \times M12$ fixings per spigot.

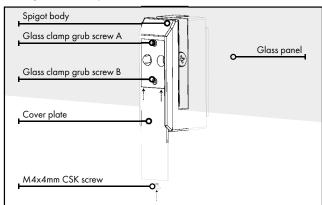

Before installing glass, use a spirit level to adjust spigot to vertical position.

Recommended to use a string line from first to last spigot in alignment to ensure all spigots are level.

Use the shown tilt grub screws on the top and bottom to tilt the spigot forward or back. Lock off grub screws (refer 3B) should be loosened off at this stage.

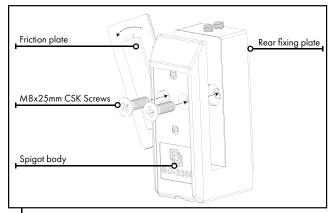

Install note: Shorter M8 grub screws included in case of large angle adjustments causing existing grub screw to protrude. Replace with shorter M8 grub screw as required.

Install 12mm thick glass into spigot and tighten glass clamp grub screws A and B. Install cover plate by sliding upwards into recess at front of spigot.

Secure cover in place with 1 x M4x4mm counter sunk screw.

Install note: To ensure cover plate can slide into position, the spigot must have a 70mm minimum gap to floor/ground.

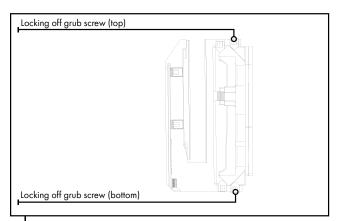

Remove friction plate from spigot body. Insert 2x M8x25mm counter sunk screws through holes in front and into back holes locating into threaded bosses in rear plate.

Tighten M8x25mm counter sunk screws, securing the spigot front to rear plate.

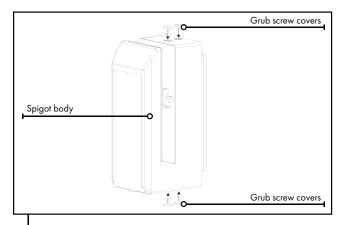

Use Loctite 242 or Ultraloc 3242 to ensure long lasting and secure fixing.

Replace friction plate to spigot.

Once spigot is level use locking off grub screws (top and bottom) to secure spigot in position.

Ensure grub screws are tightly affixed.

Adhere grub screw covers with silicone.

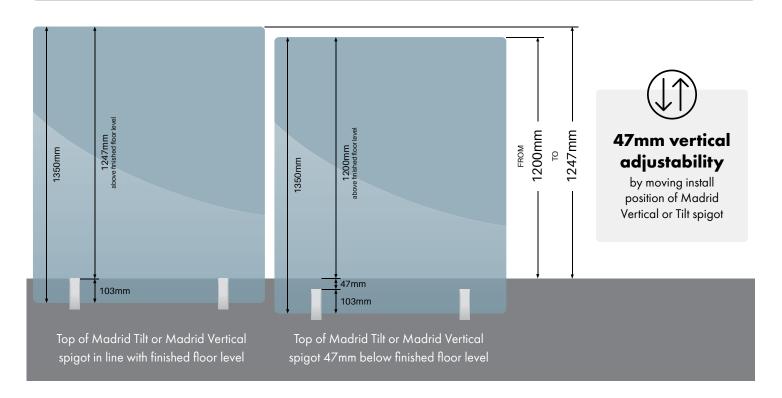

BEWARE OF ELECTRICAL WIRING PRIOR TO DRILLING AND INSTALLING ANY FITTINGS

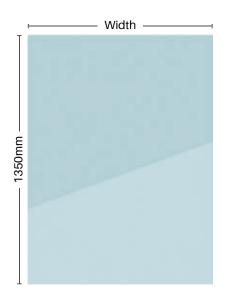

MADRID TILT SS2205

Applies to Madrid Tilt & Madrid Vertical spigots

MADDEL-TF-S (Satin)

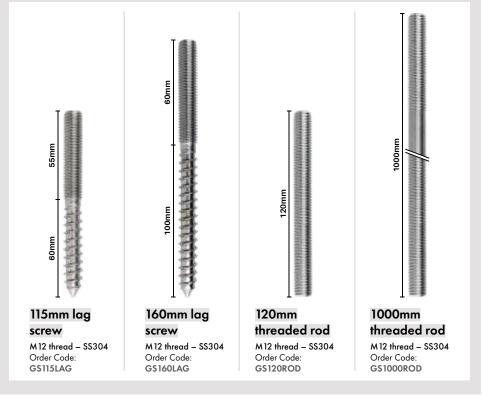

MADDEL-TF-B (Black)

- \cdot Stainless Steel 2205 spigot in polish, satin or matt black finish
- $\cdot \, \text{Top fix spigot installed with single central M12 fixing and specially machined nut} \\$
- · Single central fixing ideal for narrow/PFC beams and slab installations
- · No large core holes, or domical covers required
- · 45mm front slimline profile x 65mm depth
- · Suits 12mm up to 17.52mm glass
- · Friction fit glass installation with recessed friction packer no holes in glass required
- · 120mm depth spigot mouth provides extra clamping strength and rigidity
- · Internal packers included for glass panel alignment and tilt adjustment
- 5mm thick SS2205 height adjustment packer for uneven surfaces available in polish, satin and matt black finish (sold separately)

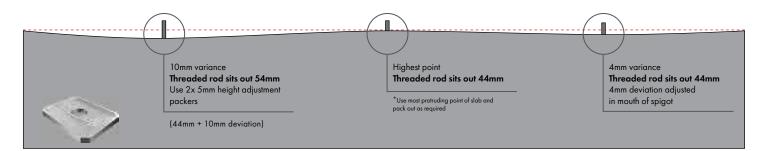

MADRID TOP FIX CONCRETE INSTALL GUIDE

NOTE: Attach a stringline to the surface from where the first spigot is being installed to where the last spigot is being installed and note any variance in floor level. Refer to below example for further information.

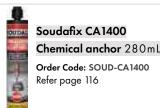

HEIGHT ADJUSTMENT GUIDE

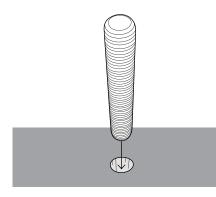

For larger floor variances, continue same methodology

Floor variance	Adjustment required
1 mm - 5 mm	Adjust glass with packers in mouth of spigot 5mm height adjustment of glass is possible in mouth of spigot
5.1 mm – 10 mm	Use 1x 5mm stainless packer and adjust glass with packers in mouth of spigot
10.1 mm - 15 mm	Use 2x 5mm stainless packer and adjust glass with packers in mouth of spigot
15.1 mm – 20mm	Use 3x 5mm stainless packer and adjust glass with packers in mouth of spigot
20.1 mm - 25 mm	Use 4x 5mm stainless packer and adjust glass with packers in mouth of spigot

Drill 1x 14mm hole in concrete slab where spigot will be installed. Insert M12 threaded rod into the hole and ensure rod is protruding from the slab 44mm (or as required subject to diagram above). Chemically anchor rods into place.

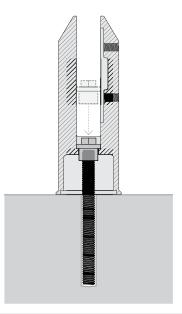

Place Madrid Top Fix Spigot down onto M12 fixing. Position machined nut into centrally located cavity in the spigot and tighten nut securely onto thread (It is always recommended to use Loctite on fixing threads). Ensure spigot is firmly and securely fastened down.

Trade tip!

Tilt adjustment and side to side adjustment packers are included with each spigot to assist in installation

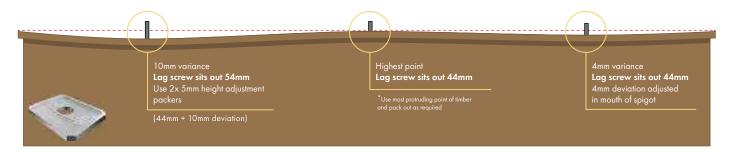

Please consult your engineer relating to questions of concrete suitability for installations as hardness of concrete may vary. For chemical anchor, refer to the manufacturer's specification of minimum embedment of anchor and hole diameter as specifications may differ between manufacturers. We are unable to give technical advice regarding substrates.

MADRID TOP FIX TIMBER INSTALL GUIDE

NOTE: Attach a stringline to the surface from where the first spigot is being installed to where the last spigot is being installed and note any variance in floor level. Refer to below example for further information.

HEIGHT ADJUSTMENT GUIDE

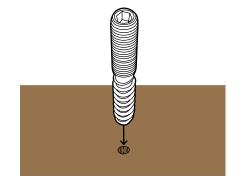

For larger floor variances, continue same methodology

Adjustment required
Adjust glass with packers in mouth of spigot 5mm height adjustment of glass is possible in mouth of spigot
Use 1x 5mm stainless packer and adjust glass with packers in mouth of spigot
Use 2x 5mm stainless packer and adjust glass with packers in mouth of spigot
Use 3x 5mm stainless packer and adjust glass with packers in mouth of spigot
Use 4x 5mm stainless packer and adjust glass with packers in mouth of spigot

Pre-drill 1x pilot hole into timber where spigot will be installed.

Drive M12 lag screw into pilot hole and ensure thread is protruding 44mm from timber (or as required subject to diagram above).

2

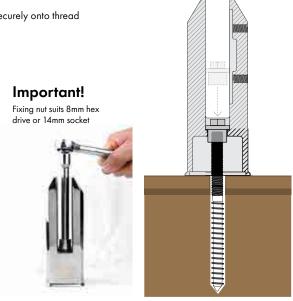

Place Madrid Top Fix Spigot down onto M12 fixing.

Position machined nut into centrally located cavity in the spigot and tighten nut securely onto thread (It is always recommended to use Loctite on fixing nut thread)

Ensure spigot is firmly and securely fastened down.

Trade tip!

Tilt adjustment and side to side adjustment packers are included with each spigot to assist in installation

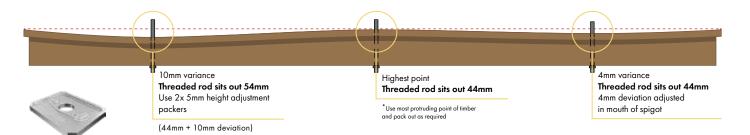

*Please consult your engineer regarding suitability and structural integrity of timber, steel or other beam/substrate. Timber hardness and strength varies and as each installation situation is different we are unable to provide technical advice regarding suitability of substrate.

MADRID TOP FIX JOIST/BEAM INSTALL GUIDE

NOTE: Attach a stringline to the surface from where the first spigot is being installed to where the last spigot is being installed and note any variance in floor level. Refer to below example for further information.

HEIGHT ADJUSTMENT GUIDE

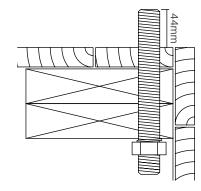

For larger floor variances, continue same methodology

Floor variance	Adjustment required
1 mm – 5 mm	Adjust glass with packers in mouth of spigot 5mm height adjustment of glass is possible in mouth of spigot
5.1mm – 10mm	Use 1x 5mm stainless packer and adjust glass with packers in mouth of spigot
10.1 mm - 15 mm	Use 2x 5mm stainless packer and adjust glass with packers in mouth of spigot
15.1 mm - 20mm	Use 3x 5mm stainless packer and adjust glass with packers in mouth of spigot
20.1 mm - 25 mm	Use 4x 5mm stainless packer and adjust glass with packers in mouth of spigot

Pre-drill 1x 12.5mm or 13mm hole through joist/beam.
Insert threaded rods and leave 44mm of thread protruding from top of joist/beam (or as required subject to diagram above).

Ensure enough thread is left protruding from underneath the joist/beam for an M12 nut with spring washer to be affixed (purchase from nut & bolt shop).

Place Madrid Top Fix Spigot down onto M12 fixing.

Position machined nut into centrally located cavity in the spigot and tighten nut securely onto thread (It is always recommended to use Loctite on fixing nut thread)

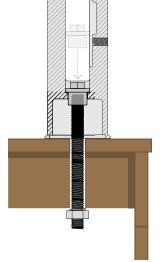

Ensure spigot is firmly and securely fastened down.

Trade tip!

Tilt adjustment and side to side adjustment packers are included with each spigot to assist in installation

*Please consult your engineer regarding suitability and structural integrity of timber, steel or other beam/substrate. Timber hardness and strength varies and as each installation situation is different we are unable to provide technical advice regarding suitability of substrate.

LIFESTYLE SQUARE RANGE SS2205

Made from superior strength duplex 2205 grade stainless steel, the Lifestyle square range provides the perfect mix of quality and strength. Innovatively designed recessed friction plates and patented double friction technology enables easy installation and tilt adjustment of glass panels.

Core drill pool spigot

DOUBLE FRICTION

Polish, satin or matt black finish

Order Code: LS-DF-S-P (Polish)

LS-DF-S-S (Satin)

LS-DF-S-B (Black)

- Duplex stainless steel 2205
- Patented double friction technology allows for easy tilt adjustment and alignment of frameless glass panels
- · Square shape with minimal visible fixings
- · 45mm front profile
- Bottom M10 bolt provides up to 60mm of vertical height adjustment and extra anchoring in footings
- Recessed friction plates provide a neat finish and easy installation
- · Structure of spigot maximises strength

Includes terminal for quick and easy earthing if required

Optional extras

Flat dress ring

100mm x 100mm outer

Polish, satin or matt black finish

Order Code: LS-DR-P

LS-DR-S

LS-DR-S

Raised dress ring

100mm x 100mm outer

Polish, satin or matt black finish
Order Code: LS-DR-RAISED-P

LS-DR-RAISED-S

LS-DR-RAISED-B

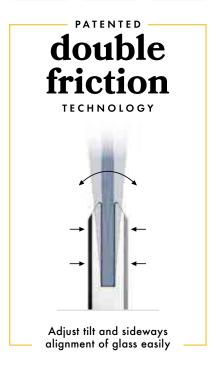

Trade tip

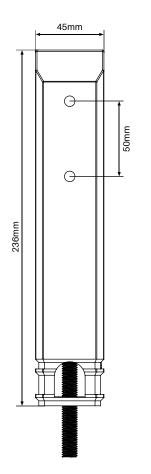

Raised dress rings are helpful if grout in the core hole sets slightly above ground level. The slightly tapered finish of the dress ring overcomes this issue.

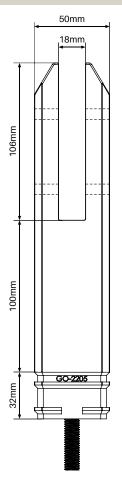

LIFESTYLE SQUARE RANGE SS2205

Double friction technology really shines in our base plated spigots. In many instances, finished floors are not level which can cause issues for frameless glass installations. Double Friction spigots allow easy alignment of glass and importantly, easy adjustment in the future – commonly required for base plated installations on timber decks.

Base plated pool spigot

DOUBLE FRICTION

Includes domical cover

Polish, satin or matt black finish

Order Code: LS-DF-SBP-P (Polish)

LS-DF-SBP-S (Satin) LS-DF-SBP-B (Black)

- Duplex stainless steel 2205
- Double friction technology saves installation time and allows ease of adjustability
- · Slimline 45mm front profile
- Recessed double friction plates enable fast install plus tilt and sideways adjust of frameless glass
- Multiple fixing points in base plate allow ease of install

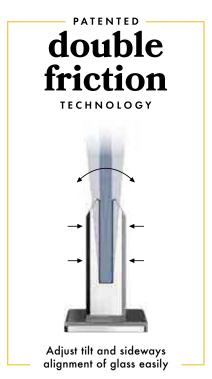

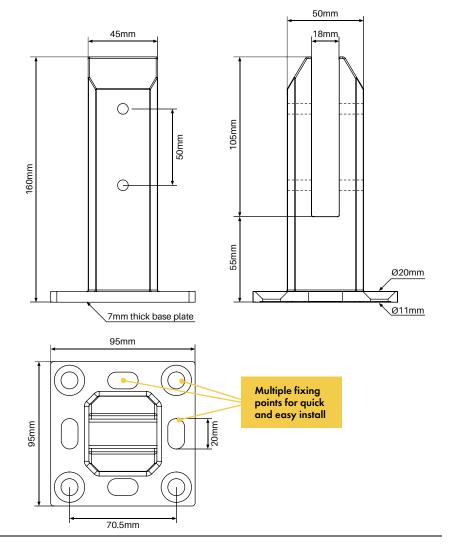

See page 52 for convenient timber & concrete fixing kits for base plated installs

Stainless steel 2205 is a superior duplex stainless steel which features elevated levels of chemical components enabling superior strength and corrosion resistance in harsh marine environments. The Rio range has been designed with superior strength and a classic round profile.

Core drill spigot

FRICTION FIT

Polish, satin or matt white finish

Order Code: RIO-S-P (Polish) RIO-S-S (Satin) RIO-S-MW (White)

- Duplex stainless steel 2205
- Stylish round shape designed for maximum strength
- M10 bolt at bottom enables up to 60mm of vertical height adjustment, a contact point for earthing, and extra anchoring in footings (helpful when working with sand)
- · Recessed single friction plate for neat finish & easy installation
- Tapered packer included (1mm to 1.5mm) to enable tilt adjustment of glass

Optional extras

Flat dress ring

Ø90mm outer Polish, satin or matt white finish

Order Code: RIO-DR-P **RIO-DR-S**

RIO-DR-MW

Domed dress ring

Ø102mm outer Polish, satin or matt white finish

Order Code: RIO-SDC-P **RIO-SDC-S**

RIO-SDC-MW

Trade tip

Raised dress rings are helpful if grout in the core hole sets slightly above ground level. The slightly tapered finish of the dress ring overcomes this issue.

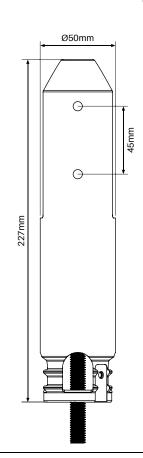

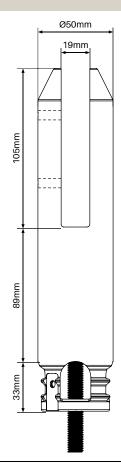

Did you know!

Stainless steel 2205 has far superior corrosion resistance properties and strength than SS316 grade.

This extra strength and corrosion resistance comes from the elevated levels of chromium, molybdenum and nitrogen.

It gets its name 'duplex stainless steel' as its microstructure is essentially half ferrite and half austenite.

RIO RANGE SS2205

Stainless steel 2205 is a superior duplex stainless steel which features elevated levels of chemical components enabling superior strength and corrosion resistance in harsh marine environments. The Rio range has been designed with superior strength and a classic round profile.

Base plated spigot

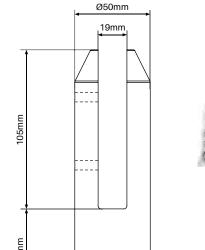

FRICTION FIT

Polish, satin or matt white finish

Order Code: RIO-SBP-P (Polish)
RIO-SBP-S (Satin)
RIO-SBP-MW (White)

- Duplex stainless steel 2205
- Contemporary tapered top to comply with 'no toe hold' requirements
- Base plate has 4x countersunk holes to enable flush fixing. Countersunk timber screw available (hex head drive)
- · Round shape with minimal visible fixings
- Recessed single friction plate for neat finish & easy installation
- Structure of spigot maximises strength
- Tapered packer included (1mm to 1.5mm) to enable tilt adjustment of glass

Optional extras

Slimline domical

cover

Polish, satin or matt white finish

Ø50mm

POLYSTAINLESS SPIGOT

The polystainless fencing spigot is made from extremely durable non-conductive composite material (patented product). Being non-conductive means there is no requirement for earthing under AS3000:2007 (equipotential bonding).

Years of research and development has led to the formulation of a new composite material giving a stainless steel feel and appearance. Other composites have a 'plastic' look and feel while also lacking in strength.

Polystainless is a genuine industry first product innovation which overcomes requirement of earthing spigots for pool fencing.

Core drill spigot

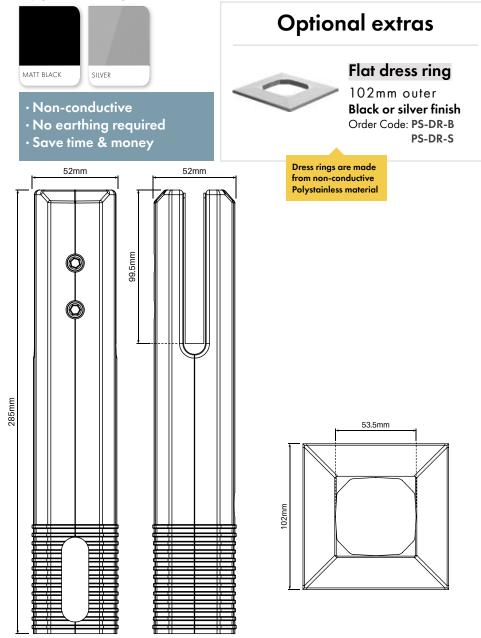

FRICTION FIT

Matt black or silver finish

Order Code: PS-S-B (Matt black)

PS-S-S (Silver)

- No electrician required for earthing save time and money!
- NATA tested in accordance with Australian Standards (AS1926.1 Safety Barriers for Pools)
- Made from ultra-robust, UV stabilised reinforced composite material giving a stainless steel feel and appearance (patented product)
- · Composite construction surface will not rust or corrode
- · Suits 12mm thick glass panels
- Designed for core drill installations
- Recessed friction plate for ease of install
- Includes 2 x grub screw friction-fit caps
- · Spigot and dress ring available in matt black or silver finish

POLYSTAINLESS SPIGOT

Base plated spigot

FRICTION FIT

Matt black or silver finish

Order Code: PS-SBP-B (Matt black)

PS-SBP-S (Silver)

- No electrician required for earthing save time and money!
- NATA tested in accordance with Australian Standards (AS1926.1 Safety Barriers for Pools)
- Made from ultra-robust, UV stabilised reinforced composite material giving a stainless steel feel and appearance (patented product)
- Composite construction surface will not rust or corrode
- Suits 12mm thick glass panels
- Designed for base plated installations
- · Recessed friction plate for ease of install
- Includes 2 x grub screw friction-fit caps
- · Spigot and domical cover available in matt black or silver finish

- · No earthing required
- Save time & money

Optional extras

Domical cover

100mm outer

Black or silver finish

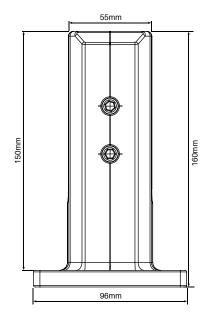

Order Code: PS-SDC-B

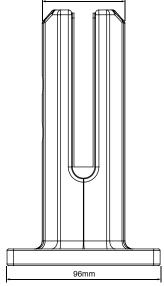

PS-SDC-S

Domical covers are made from non-conductive Polystainless material

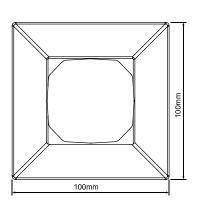

56mm

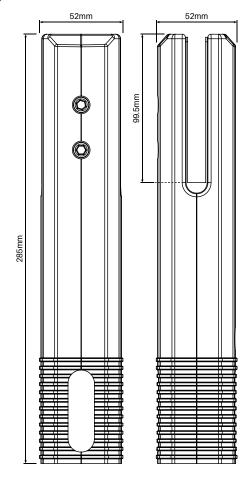

POLYSTAINLESS SPIGOT ESSENTIALS RANGE

The polystainless fencing spigot is made from extremely durable non-conductive composite material (patented product). Being non-conductive means there is no requirement for earthing under AS3000:2007 (equipotential bonding).

As an alternative to pre-coated Polystainless spigots, the ESSENTIALS range features an uncoated Polystainless spigot onto which a slimline cover is placed allowing for 3 different colour finishes (black, white or silver).

The ESSENTIALS range is a more cost effective solution than the premium pre-coated Polystainless range.

Core drill spigot

FRICTION FIT

Uncoated finish

Order Code: PSE-S-BLK (Uncoated finish)

- No electrician required for earthing save time and money!
- NATA tested in accordance with Australian Standards (AS1926.1 Safety Barriers for Pools)
- Made from ultra-robust, reinforced composite material (patented product)
- · Suits 12mm thick glass panels
- Designed for core drill installations
- · Recessed friction plate for ease of install
- Select desired colour of slimline cover and sleeve onto spigot (cover sold separately)

SELECT COVER FINISH TO SUIT

Core drill spigot insulator for Polystainless Essentials spigot

Black, silver gloss or white finish

Order Code: PSE-COVER-CD-B (Black)
PSE-COVER-CD-SG (Silver Gloss)
PSE-COVER-CD-W (White)

1 x SPIGOT INSULATOR
1 x DRESS RING (112 x 112 mm)

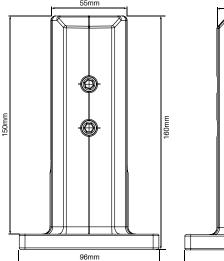

- 2x FRICTION SCREW COVERS
- Made from ASA thermoplastic excellent weather & chemical resistance and high impact strength
- Non-conductive material
- Includes 1x dress ring
- Also includes 2x caps which fit into friction grub screw holes
- Simply sleeve over Polystainless Essentials core drill spigot prior to install. Then install glass with spigot as per normal

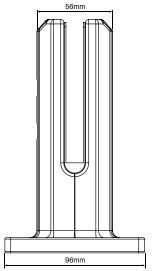

POLYSTAINLESS SPIGOT

ESSENTIALS

Base plated spigot

FRICTION FIT

Uncoated finish

Order Code: PSE-BP-BLK (Uncoated finish)

- Designed for base plated installations
- · No electrician required for earthing save time and money!
- NATA tested in accordance with Australian Standards (AS1926.1 Safety Barriers for Pools)
- Made from ultra-robust, reinforced composite material giving a stainless steel feel and appearance (patented product)
- Suits 12mm thick glass panels
- · Recessed friction plate for ease of install
- Select desired colour of cover & sleeve onto the base plated spigot

SELECT COVER FINISH TO SUIT

Base plated spigot insulator for Polystainless Essentials spigot

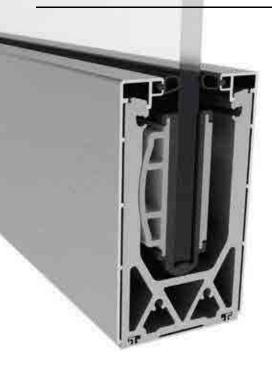

Black, silver gloss or white finish

Order Code: PSE-COVER-BP-B (Black)
PSE-COVER-BP-SG (Silver Gloss)
PSE-COVER-BP-W (White)

- 1x SPIGOT INSULATOR
- 1x DOMICAL COVER (116 x 116 x 23 mm)
- 2x FRICTION SCREW COVERS
- Made from ASA thermoplastic excellent weather & chemical resistance and high impact strength
- Non-conductive material
- Includes 1x domical cover
- Also includes 2x caps which fit into friction grub screw holes
- Install the vertical spigot stem onto the Essentials base plated spigots before installation of glass. Once the base plated spigot is fixed to the ground, fit on the 2-part domical cover.

VERSATILT ALUMINIUM

The Versatilt aluminium channel system with glass tilt adjustability sets the new standard for face mount and deck mount channel installations.

Channels available in clear anodised finish at 4200mm long with pre-drilled fixing holes suitable for either face mount or deck mount installation. Covers simply snap on to conceal all fixings. In a massive technical advancement, the patented rotator plates allow friction fitting and **TILT ADJUSTMENT** of glass inside the channel.

The Versatilt channel is perfect for pool fence installations and particularly face mount situations.

- · Suits 12mm to 15mm toughened glass
- · Channel finish is clear anodised Covers available in brushed satin anodised, black anodised or mill finish
- \cdot Face mount & deck mount styles available 4200mm long
- · Pre-machined elongated fixing holes
- · Easy snap-on covers hide all fixings
- · Highest quality complete channel system + easy to install!
- · For corner installations there is no need to mitre cut the channel itself.
 Simply cut covers for easy installation Channel can butt join and be hidden by covers
- · For pool fencing applications, use our 1350mm high 'Clear glaze' glass (See page 12)

Patented tilt

VERSATILT ALUMINIUM

Face mount channel kit

Mill, brushed satin, black anodised Order Code: VER-4200-FMK-M VER-4200-FMK-SA VER-4200-FMK-B

- · Clear anodise aluminium 4200mm long channel
- · Mill, brushed satin or black anodised finish aluminium 4450mm long covers
- · Pre-machined elongated fixing holes in channel
- · 1x full cover, 1x top cover & 1x bottom cover

Face mount end plates

Mill, brushed satin, black anodised Order Code: VER-2FMEP-M VER-2FMEP-SA VER-2FMEP-B

- · 2x machined aluminium end plates
- · Suits face mount channel
- · Mill, brushed satin or black anodised finish
- · 4x SS316 panhead screws

Deck mount channel kit

Mill, brushed satin, black anodised Order Code: VER-4200-DMK-M VER-4200-DMK-SA VER-4200-DMK-B

- · Clear anodise aluminium 4200mm long channel
- · Mill, brushed satin or black anodised finish aluminium 4450mm long covers
- · Pre-machined elongated fixing holes in channel
- · 2x full covers & 2x top covers (discard covers not required)

Deck mount end plates

Mill, brushed satin, black anodised Order Code: VER-2DMEP-M VER-2DMEP-SA VER-2DMEP-B

- · 2x machined aluminium end plates
- · Suits deck mount channel
- · Mill, brushed satin or black anodised finish aluminium
- · 4x SS316 panhead screws

Pressure plate kit

Order Code: VER-PPKIT

- · Suits 12mm thick glass
- · Use 4x plate kits per pool panel

Top infill

Order Code: VER-0300-TI

- · 300mm long cut as required
- · EPDM black rubber
- $\cdot \, \text{Position between glass in channel} \,$

Alignment pins

Order Code: VER-PINS

- · SS316 10 pack
- · Use to join inline channels together

12mm glazing rubber

Order Code: VER-12KIT-RUB-2PK

- · Pack of 2 lengths of glazing rubber to suit 12mm glass
- · Optional spare part

Spanner

Order Code: VER-SPANNER

- · Slimline spanner for tightening nuts on pressure plates
- · Features innovative ratchet for fast tightening

Stabilising Washer

Order Code: VER-WASHER-14PK

- · Pack of 14
- · SS316 stabilising washer for DECK MOUNT channel
- · Provides a flat surface for fixing into channel. Simply place washer in pre-machined holes.

You'll need these.

15mm U gasket kit

Order Code: VER-15KIT-GAS

- · Pack of 6 gaskets
- · Thin U gasket to use with
- 14.28mm and 15mm thick glass
- · Use with VER-PP-KIT: Simply discard standard U gasket

15mm glazing rubber kit

Order Code: VER-15KIT-RUB

- · Includes 2x 4450mm (R2 & R14 bulb) rubbers to suit Versatilt covers
- · Simply discard standard rubbers supplied with covers

SPIGOT OPTIONAL EXTRAS

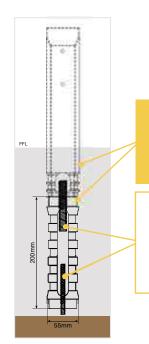

Spigot extender

200MM LONG **\$\$304**

Order Code: S-XT

- M10 & M16 bolts at opposite ends enables extra anchoring in footings (particularly helpful when working with sand)
- · Stainless steel 304
- Suits Lifestyle, Madrid and Rio core drill spigots

Both spigot base and spigot extender must be encased by concrete or grout

Attach the extender to the spigot using either M10 or M16 threaded end depending on your spigot type

We offer a range of Stainless Steel 316 grade countersunk self tapping screws perfect for affixing base plated spigots to timber decks or stainless fittings to timber posts.

Each screw is expertly crafted with a hex head drive to ensure easy installation

Counter sunk timber screw – 4 pack

100MM LONG – SS316 (Hex head drive) Order Code: CSK-100-4PK

- Heavy duty self tapping screw
- 100mm long with M10 thread
- Ø18mm outer head
- Hex head drive
- Ideal for fixing base plated spigots to timber deck
- Countersunk head allows screw to finish flush with top edge of base plate for neat finish

Bugle batten screw

75MM LONG – SS316 (Hex head drive) Order Code: **CSK-075**

- Self tapping screw 14G x 75mm long -Ø14mm outer head
- Hex head drive
- Ensure inner diameter of base plated spigot hole suits a screw with 14mm diameter outer head (Base plate hole diameter varies on spigot ranges)

M10 x 120mm hex coach screw

SS316

Order Code: S-120COACH

- Use if base plating to timber substrate
- Ensure timber substrate is suitable for fixing to
- Sold as single screw

Timber fixing kit

4 PACK - SS316 Order Code: **S-110LAG-4PK**

Order Code: 5-110LAG-4PK

- M10 x 110mm timber lag screws x4 with nuts and washers
- Nuts fit under high domical covers.
 Fixing kit cannot be used with slimline covers (slimline covers use countersunk fixings)
- · Nut is 8mm thick

Concrete fixing kit

4 PACK - SS316

Order Code: S-120ROD-4PK

- M10 x 120mm concrete threaded rods x4 with nuts and washers
- Nuts fit under high domical covers.
 Fixing kit cannot be used with slimline covers (slimline covers use countersunk fixings)
- · Nut is 8mm thick

GLASSMATE™ & GLASS BUDDY

The revolutionary new tool that increases speed and accuracy of glass installations

- Increase speed & accuracy of installations
- No need for timber bracing or chocks
- Adjust tilt of glass quickly and easily by simply turning adjustment knobs
- Raise or lower to millimetre perfection
- \bullet Glass is self supported with a GlassMate $^{\text{\tiny{TM}}}$ at each end of panel
- Durable powder coated aluminium tool for long term use

Order Code: GLASSMATE

Turn one knob to adjust tilt. Turn both knobs to raise or lower glass

Rubber to ensure glass panels are protected from scratching

30mm wide profile allows easy removal of tool between or underneath panels after installation

Durable powder coated aluminium

Allow a 32mm minimum gap between or below panels to remove tool

Easily adjust glass height and tilt with GlassMate™!

GLASS BUDDY

- Made from durable marine plywood
- Handy brace for clamping panels of glass together during installation to ensure perfect alignment
- Wingnut on opposite side allows for fast and easy clamping

Order Code: GLASSBUDDY

Glass gate & hardware

selection

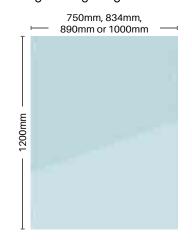

Follow our easy steps below to get your perfect gate hardware & set up

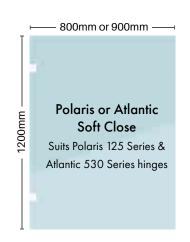

If using our **Master Range** 8mm thick gates, **see pages 56-57** for hardware specifications and **pages 72-73** for installation configurations.

If using our **Soft Close hinges** 12mm thick gates, **see pages 58-67** for hardware specifications and **pages 74-75** for installation specifications.

To complement the finest quality glass panels and spigots, we also provide a complete range of hinge and latch gate hardware options

Select between our **Master Range** 8mm thick or **Soft Close** 12mm thick toughened glass gates

2a

Choose between our Master Range or Polaris Soft Close or Atlantic Soft Close gate hinge ranges

Master Range

For Master Range or Polaris 155 Series gate layouts – refer pages 72-73

For **Atlantic 530 Series Soft Close** or **Polaris Soft Close 125 Series** – refer pages 74-75

Need a heavy duty post to hinge or latch to? Refer pages 76-80 for gate to post layout options.

MASTER RANGE HINGES

Our Master Range self closing hinges are stainless steel 316 and incorporate an integrated "anti toe hold" cone cap. Available in a variety of styles to suit glass to glass, square post, round post and face mount applications. Master Range hinges have been tested to cycle count self closing requirements and are an excellent choice when it comes to style & price.

Glass to glass hinge set

SS316 - PAIR OF 2

Polish, satin, matt black or matt white finish

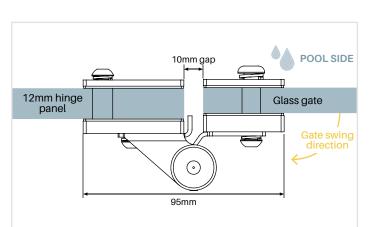

Order Code: MR-GGH-P (Polish)

MR-GGH-S (Satin)

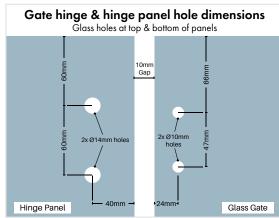

MR-GGH-BLK (Black)

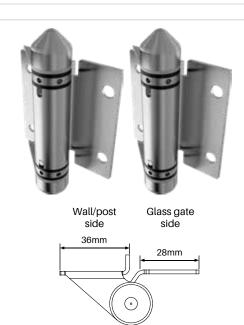

MR-GGH-MW (Matt White)

- · Stainless steel 316 backing plates for premium finish
- · Suits glass to glass application
- · Cone cap incorporated to prevent toe hold
- Suits 8mm and 10mm glass gates
- · Weight capacity of 25kg per pair

Face mount hinge set

SS316 - PAIR OF 2

Polish or satin finish

Order Code: MR-FMH-P (Polish) MR-FMH-S (Satin)

- Suits face mount application Use when hinging off the front face of a wall/post
- Cone cap incorporated to prevent toe hold
- Suits 8mm and 10mm glass gates
- · Weight capacity of 25kg per pair
- Includes SS316 plate (on opposite side to hinge) for affixing glass gate to hinge

MASTER RANGE HINGES

Wall/sq. post to glass hinge set

SS316 - PAIR OF 2

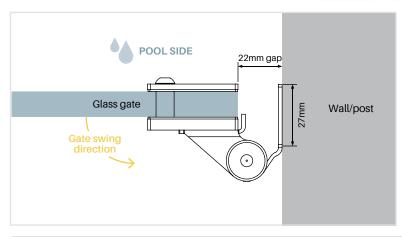

Polish, satin, matt black or matt white finish

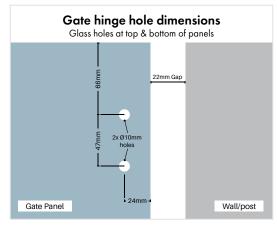

Order Code: MR-SPH-P (Polish)

Glass to glass hinge set 530 SERIES

SS2205 - PAIR OF 2

Polish, satin, matt black or matt white finish

Order Code: AH-530G-P (Polish)

AH-530G-S (Satin)

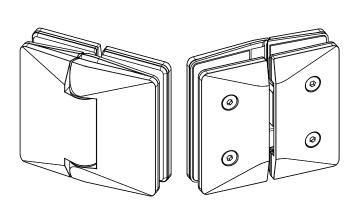

AH-530G-B (Black)

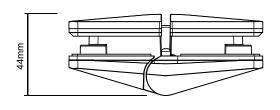

AH-530G-W (White)

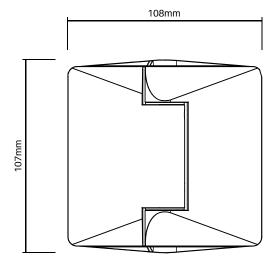

- 2205 grade stainless steel
- Pool compliant self-closing glass to glass hinge
- Modern minimalist design including anti-toe hold
- Fast install: no need to remove backing plates
- Strong clamping force of plates to glass
- Premium soft close hinge
- Suits 10 & 12mm thickness glass: max weight 70kg

530 SERIES

Glass to wall hinge set 530 SERIES

SS2205 - PAIR OF 2

Polish, satin, matt black or matt white finish

Order Code: AH-530W-P (Polish)

AH-530W-S (Satin)

AH-530W-B (Black)

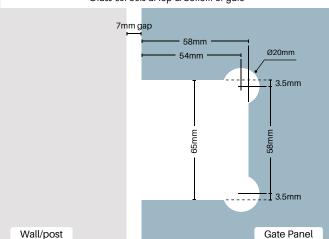

AH-530W-W (White)

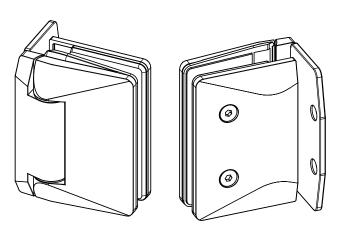

- 2205 grade stainless steel
- · Pool compliant self-closing wall to glass gate hinge
- 4 x fixings holes to wall/post
- · Modern minimalist design including anti-toe hold
- Fast install: no need to remove backing plates
- · Strong clamping force of plates to glass
- Premium soft close hinge
- Suits 10 & 12mm thickness glass: max weight 70kg

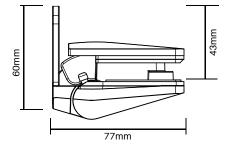

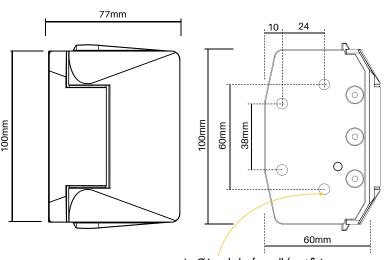

Glass to wall or post hinge cut out specification

Glass to square post backing plates **530 SERIES**

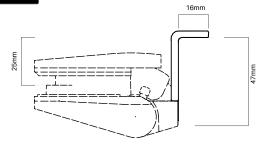

SS2205 - PAIR OF 2

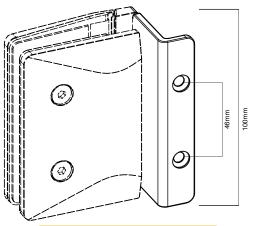

Polish, satin, matt black or matt white finish

Order Code: AH-530SPB-P (Polish) AH-530SPB-S (Satin) AH-530SPB-B (Black)

- AH-530SPB-W (White) • 2205 grade stainless steel
- · Backing plate suits a 50mm square post
- 4 x 6mm diameter fixing holes to post:
- 2 x holes on 16mm wide return leg and 2 x holes on inner plate
- Install process fit hinges to gate and position in place. Screw to post via 2 x holes on 16mm return outer leg then open gate and fix off via 2 x inner holes

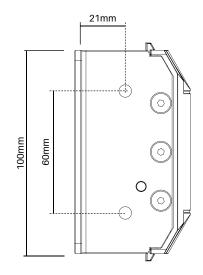

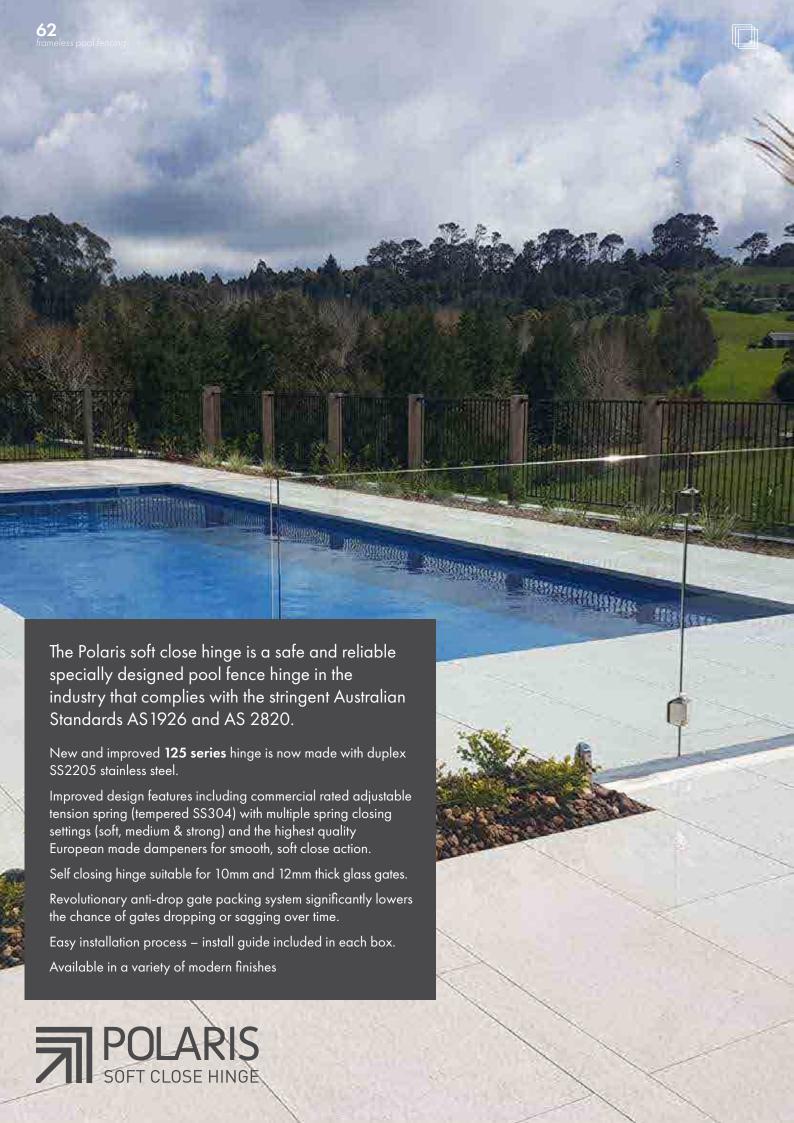

AH-530W & AH-530SPB shown above

Backing plates are sold separately! You must purchase glass to wall hinges as well as the square post backing plates. Simply unscrew and remove the existing wall plates and replace with the square post backing plates.

125 SERIES

Glass to glass hinge set 125 SERIES

SS2205 - PAIR OF 2

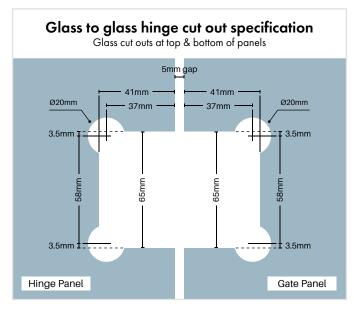

Polish, satin, matt black or matt white finish

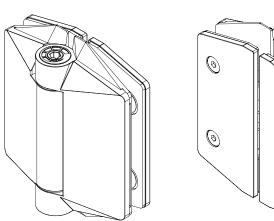

Order Code: PSC-125GG-P (Polish) PSC-125GG-S (Satin)

> PSC-125GG-B (Black) PSC-125GG-MW (White)

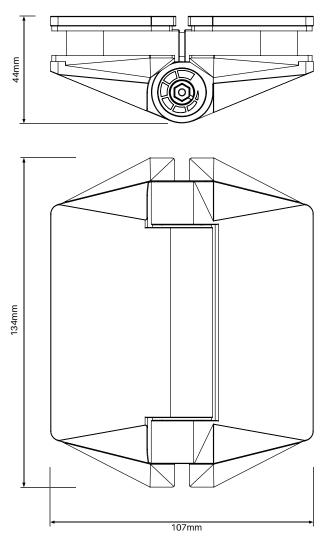

- · 2205 grade stainless steel
- · Self closing pool fence compliant safety hinge
- Tested to cycle count Australian Standards requirements
- Adjustable closing speed with European dampeners providing a soft close action
- · Cone cap incorporated on bottom hinge for anti-toe hold
- Suits 10 or 12mm thick glass gates (max 45kg)

(B)

125 SERIES

Glass to wall hinge set 125 SERIES

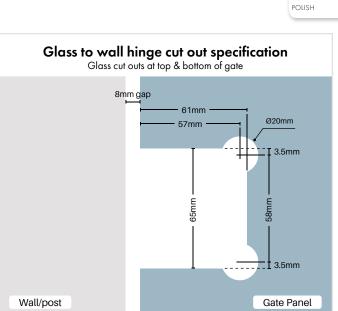

SS2205 - PAIR OF 2

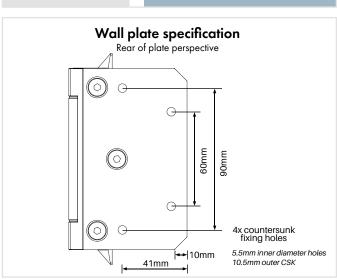

Polish, satin, matt black or matt white finish

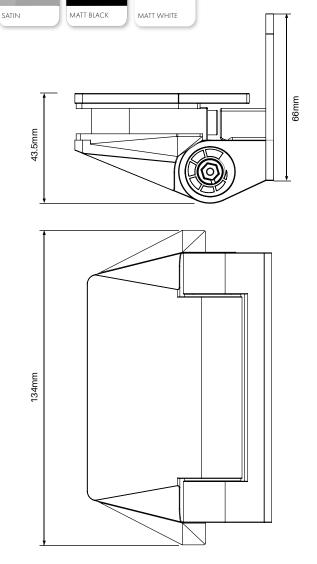

Order Code: PSC-125W-P (Polish)

PSC-125W-S (Satin) PSC-125W-B (Black) PSC-125W-MW (White)

- 2205 grade stainless steel
- 4x fixing holes to wall/post
- Self closing pool fence compliant safety hinge
- Tested to cycle count Australian Standards requirements
- Adjustable closing speed with European dampeners providing a soft close action
- Polymer cone cap supplied and can be fitted on bottom hinge for anti-toe hold
- Suits 10 or 12mm thick glass gates (max 45kg)
- Easy gate installation: firstly, fit hinges to gate and place gate in proposed position. Once in correct position, screw off to wall/post through 2 x outer holes. Then open the gate and screw off through 2 x inner holes.

125 SERIES

Glass to square post backing plates 125 SERIES

SS2205 - PAIR OF 2

Polish, satin or matt black finish

Order Code: PSC-125PLATE-SP-P (Polish)

PSC-125PLATE-SP-S (Satin) PSC-125PLATE-SP-B (Black)

- 2205 grade stainless steel
- · Backing plate suits a 50mm square post
- 4 x 5mm diameter fixing holes to post:
- 2 x holes on 25mm wide return leg and 2 x holes on inner plate
- Install process fit hinges to gate and position in place. Screw to post via 2 x holes on 25mm return outer leg then open gate and fix off via 2 x inner holes

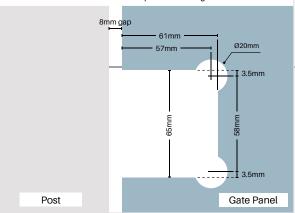

Glass cut outs at top & bottom of gate

Backing plates are sold separately! You must purchase glass to wall hinges as well as the square or round post backing plates. Simply unscrew and remove the existing wall plates and replace with the square or round post backing plates.

PSC-S155-W-B (Black)

- 2205 grade stainless steel
- Self closing pool fencing complete glass to glass hinge
- Tested to cycle count required by Australian Standards
- · Spring tension adjustable via simple rachet cap
- 4 x fixing holes to post/wall
- Suits 8 & 10mm thick glass gates. Suits our Master Range glass gates

Glass gate to round post 155 SERIES

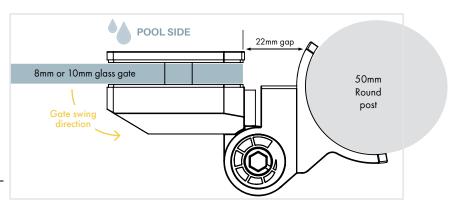

SS2205 - PAIR OF 2

Order Code: PSC-S155-RP-P (Polish)
PSC-S155-RP-S (Satin)

PSC-S155-RP-B (Black)

- 2205 grade stainless steel
- $\bullet \ \, \text{Self closing pool fencing complete glass to glass hinge}$
- Tested to cycle count required by Australian Standards
- \bullet Spring tension adjustable via simple rachet cap
- 4 x fixing holes to 50mm round post
- Suits 8 & 10mm thick glass gates. Suits our Master Range glass gates

MASTER RANGE LATCHES

Our Master Range are available in a variety of styles to suit glass to glass, square post, round post and 90 degree corner applications. A high quality latch is supplied as standard for nylon side pull latches. An optional D&D Technologies lockable side pull latch can be retrofitted. We also stock a range of D&D Technologies stainless steel latches. The Master range latch range is available in polish or satin finish with matt black in selected styles.

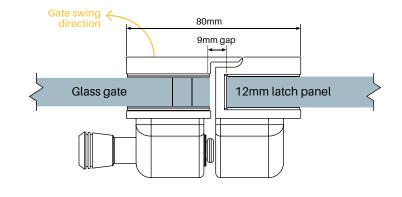

Glass to glass stainless steel latch kit

SS316

Polish or satin finish

Order Code: MR-FLGGSS-P (Polish) MR-FLGGSS-S (Satin)

- · Genuine D&D stainless steel side pull latch
- Friction keeper for glass to glass 180° application
- Suits 8mm, 10mm and 12mm glass gates
- · Latch panel must be 12mm thick no latch holes required

Glass to glass latch kit

SS316 & Polymer

Polish, satin, matt black or matt white finish

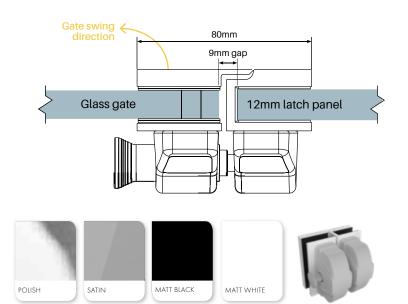

Order Code: MR-FLGG-P (Polish)

MR-FLGG-S (Satin)

MR-FLGG-B (Black)

MR-FLGG-MW (Matt White)

- Premium nylon side pull latch
- Friction keeper for glass to glass 180° application
- · Suits 8mm, 10mm and 12mm glass gates
- · Latch panel must be 12mm thick no latch holes required

MASTER RANGE LATCHES

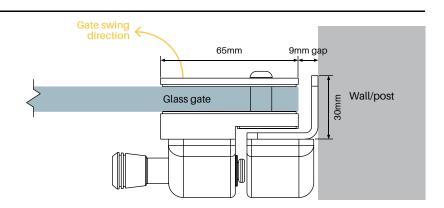

Wall/square post to glass stainless steel latch kit

SS316

Polish or satin finish

Order Code: MR-WGLSS-P (Polish) MR-WGLSS-S (Satin)

- · Genuine D&D stainless steel side pull latch
- Latch for wall/sq. post to glass gate application
- · Suits 8mm, 10mm and 12mm glass gates

Wall/square post to glass latch kit

SS316 & Polymer

Polish, satin, matt black or matt white finish

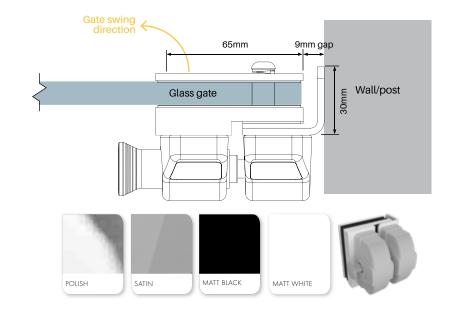

Order Code: MR-WGL-P (Polish)

MR-WGL-S (Satin)

MR-WGL-B (Black)

MR-WGL-MW (Matt White)

- · Premium nylon side pull latch with SS316 backing plates
- · Latch for wall/sq. post to glass application
- · Suits 8mm, 10mm and 12mm glass gates

Extended wall plate suits wall/sq post with nylon black

latch (MR-WGL)

Extended wall plate only

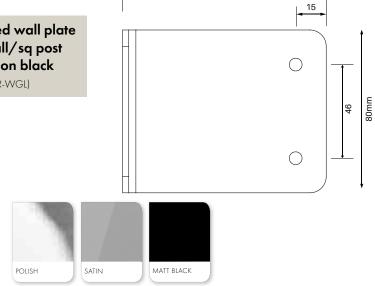

Polish, satin or matt black finish

Order Code: MR-WPEXT-P (Polish)

MR-WPEXT-S (Satin)

MR-WPEXT-B (Black)

- Extended plate for wall/sq. post to glass gate application
- · Allows fixing of plate to wall set back from wall edge
- · Wall/square post to glass gate latch kit sold separately
- · Discard standard wall fitting in kit and replace with extended wall plate
- · Not suitable for use with full stainless steel D&D latch

100mm

Glass to glass external 90° corner latch kit

SS316 & Polymer

Polish, satin, matt black or matt white finish

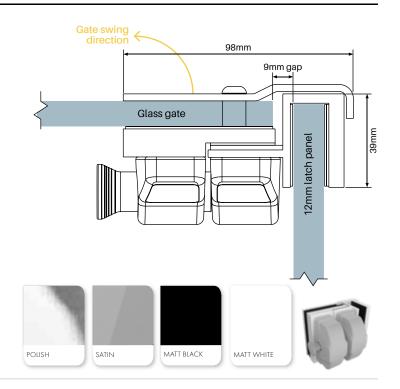

Order Code: MR-FL90E-P (Polish)

MR-FL90E-S (Satin)

MR-FL90E-B (Matt black)

MR-FL90E-MW (Matt White)

- Premium nylon side pull latch with SS316 backing plates
- Friction keeper for external fit 90° glass to glass application
- Integrated hook plate ensures latch panel cannot be separated from gate
- · Suits 8mm, 10mm and 12mm glass gates
- · Latch panel must be 12mm thick no latch holes required

Glass to glass internal 90° corner latch kit

SS316 & Polymer

Polish, satin, matt black or matt white finish

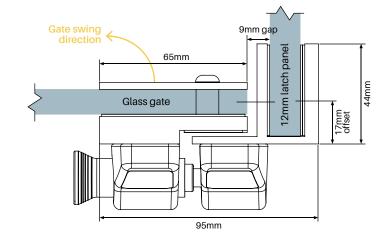

Order Code: MR-FL90I-P (Polish)

MR-FL90I-S (Satin)

MR-FL90I-B (Matt Black)

MR-FL90I-MW (Matt White)

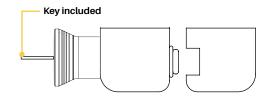

- Premium nylon side pull latch with SS316 backing plates
- Friction keeper for internal fit 90° glass to glass application
- Specially designed locking clasp mechanism ensures latch panel cannot be separated from gate
- Suits 8mm, 10mm and 12mm glass gates
- · Latch panel must be 12mm thick no latch holes required

Retro fit to master range latch kits for a lockable latch

Face mount latch

Black Polymer Black finish

Order Code: MR-FMLSL Supplier Code: MLSPS2L

- Key lockable D&D latch in black polymer finish
- All backing plates supplied with non-lockable nylon latches can be retro fitted with the D&D lockable latch and keeper
- Simply remove existing nylon non-lockable latch from backing plates, discard and replace with lockable latch.

2b

MASTER RANGE LATCHES

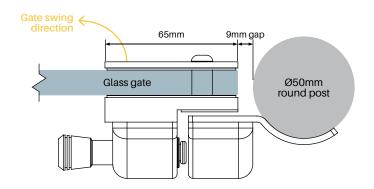

Round post to glass stainless steel latch kit

SS316

Polish or satin finish

Order Code: MR-RPLSS-P (Polish) MR-RPLSS-S (Satin)

- Genuine D&D stainless steel side pull latch
- Latch for 50mm round post to glass application
- Suits 8mm, 10mm and 12mm glass gates
- Fixing plate suits Ø50mm round post
- 3x fixing holes for fixing to round post

Black striker plate

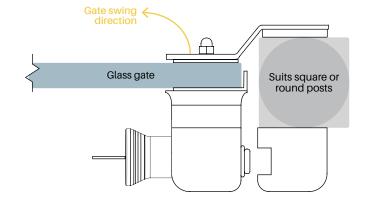

Side pull latch kit

Polymer with black powder coated aluminium Black finish

Order Code: MR-SFLSL-B (Black striker plate)

- Suits 50mm square and Ø50mm round posts
- Z shape striker plate ensures gate is centred to post
- Suits 8mm, 10mm and 12mm glass gates

STAINLESS POST & GATE LAYOUTS

A heavy duty stainless steel post to hinge or latch a glass gate may be required in certain installation situations.

It is important a heavy duty post is used to prevent the post bending under the weight of the gate. It is also very important that the substrate is sturdy and cannot bend/ or flex – such as when installing a base plated post to a timber deck with a hinging glass gate.

SELECT BETWEEN SQ50 SQUARE OR MOD50 ROUND HEAVY DUTY STAINLESS STEEL POSTS

SQ50 Heavy duty post – 50.8x50.8mm square

SS316 - 2mm wall thickness - various lengths Polish, satin or matt black finish

STAINLESS POST & GATE LAYOUTS

MASTER RANGE

SQ50 square post to post gate layout

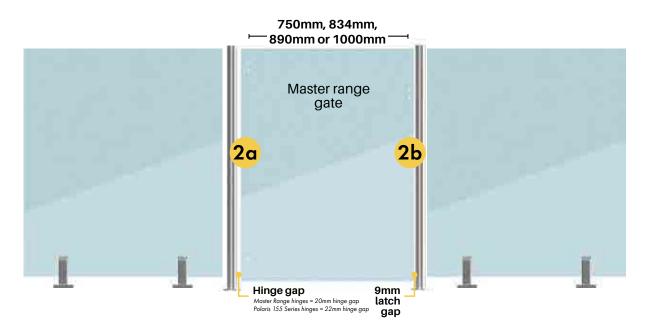

(!)

Trade tip

Substrate must be strong and not flexible. This is particularly important when installing heavy duty base plated posts to timber decks

MOD50 round post to post gate layout

STAINLESS POST & GATE LAYOUTS

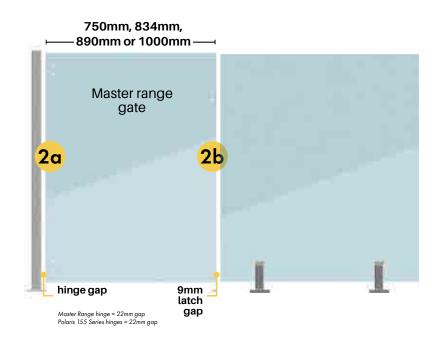

MASTER RANGE

Square post to glass square post hinges with glass to glass latch

Important!

When using square post hinges, you must use a Ø50mm post.

Due to the weight of the glass gate, we recommend using a post with a wall thickness of at least 2mm

Trade tip

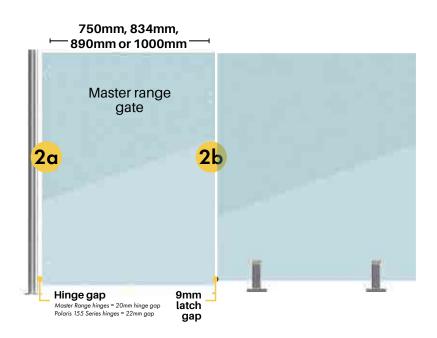

Substrate must be strong and not flexible. This is particularly important when installing heavy duty base plated posts to timber decks

Round post to glass round post hinges with glass to glass latch

Important!

When using with round post hinges, you must use a Ø50mm post.

Due to the weight of the glass gate, we recommend using a post with a wall thickness of at least 2.5mm

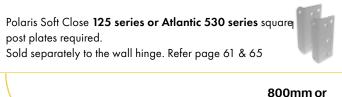

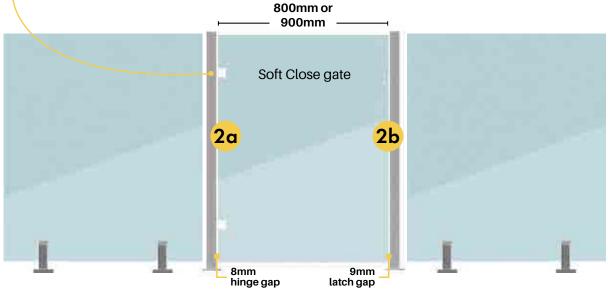

STAINLESS POST & GATE LAYOUTS ATLANTIC 530 OR POLARIS 125

Layout for Atlantic 530 Series or Polaris 125 Series gate & hinge panel

RIGI CLAMPS

A contemporary clamp which acts as a brace between glass panels, providing extra rigidity to your fence.

Clamps are made from high quality stainless steel 316, available in a variety of finishes. The clamps are 'friction fit' meaning that the glass panels do not require pre-drilled holes for fitting.

Small rigi clamp

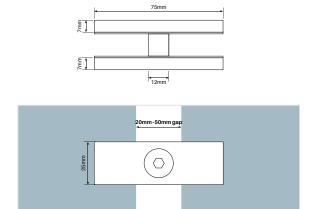

SS316

Polish, satin or matt black finish

Order Code: GC-RIGIS-P (Polish) GC-RIGIS-S (Satin) GC-RIGIS-B (Matt Black)

- · Friction fit rigi clamp
- Suits 12mm glass
- · Ideal for panels with gaps between 20-50mm

Large rigi clamp

Polish, satin, matt black or matt white finish

Order Code: GC-RIGIL-P (Polish)

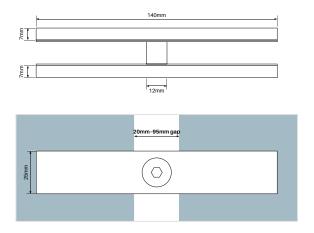

GC-RIGIL-S (Satin)

GC-RIGIL-B (Matt Black)

GC-RIGIL-MW (Matt White)

- Friction fit rigi clamp
- Suits 12mm glass
- · Ideal for panels with gaps between 20-95mm

90 degree rigi clamp

SS316

Polish, satin, matt black or matt white finish

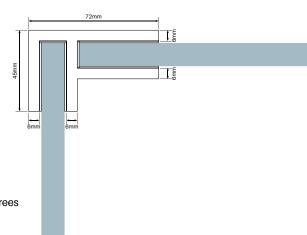

Order Code: GC-RIGI90-P (Polish)

GC-RIGI90-S (Satin)

GC-RIGI90-B (Matt Black) GC-RIGI90-MW (Matt White)

- Friction fit rigi clamp
- Bracing of glass panels at 90 degrees
- Suits 12mm glass

RIGI CLAMPS

Wall rigi clamp

SS316

Polish, satin, matt black or matt white finish

Order Code: GC-RIGIW-P (Polish)
GC-RIGIW-S (Satin)
GC-RIGIW-B (Matt Black)
GC-RIGIW-MW (Matt White)

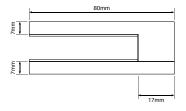

- Friction fit rigi clamp
- · Suits 12mm glass
- Brace glass to walls/posts

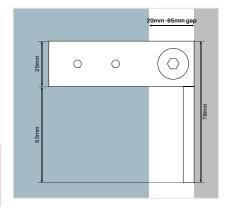

USE FOR

TIMBER FIXING.

• 14G x 50mm long with Ø11.5mm outer head

 2x countersunk fixing holes to wall/post

Offset wall rigi clamp

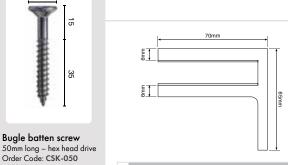

SS316

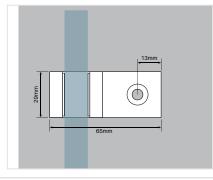

Polish, satin or matt black finish

Order Code: GC-RIGIW-O-P (Polish)
GC-RIGIW-O-S (Satin)
GC-RIGIW-O-B (Matt Black)

- Friction fit rigi clamp
- Suits 12mm glass
- · Brace glass to walls/posts
- Easy install with offset fixing clamp can be added after glass is installed
- Rotate for left or right side fixing
- 1x countersunk hole for fixing to wall/post

Swivel rigi clamp

SS316

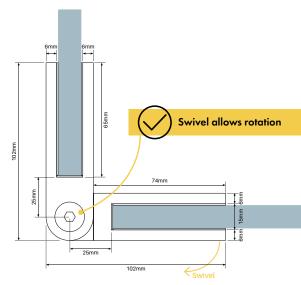

Polish, satin or matt black finish

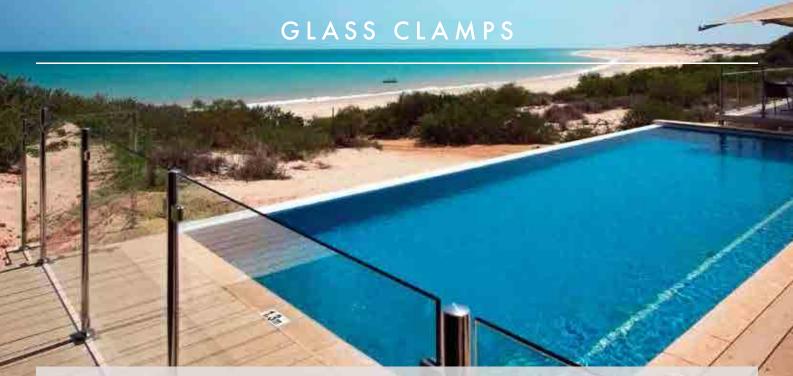

Order Code: GC-RIGISWIV-P (Polish)
GC-RIGISWIV-S (Satin)

GC-RIGISWIV-S (Satin)
GC-RIGISWIV-B (Matt Black)

- Friction fit rigi clamp
- Suits 12mm glass
- Multi angle rigi clamp a great solution for variable angle installs

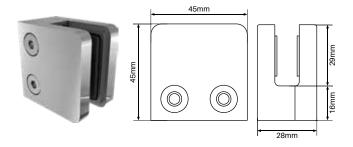

Glass clamps provide a smart & functional solution for clamping glass panels.

Our glass clamps are made from high quality 2205 grade stainless steel, available in a variety of finishes. Perfect for any semi-frameless pool fencing project.

All of our glass clamps come complete with gaskets to suit 8mm, 10mm or 12mm glass and are designed for friction fitting which eliminates the need for drill holes in glass panels.

Note: Please take care to refer to relevant standards to ensure our D clamps are suitable for your needs as each installation situation/ compliance requirement is unique

Slimline clamp – Square front, flat back

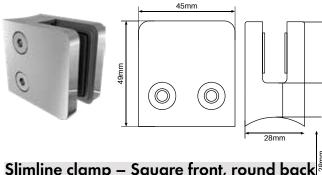

SS2205

Polish or satin finish

Order Code: GCS-S-FB-P (Polish) GCS-S-FB-S (Satin)

- Slimline 45x45mm shape
- Premium grade SS2205 in polish or satin finish
- · Gaskets included to suit 8mm or 10mm glass only (not suited to 12mm glass)
- · Gaskets made from EPDM highest quality gaskets available

Slimline clamp – Square front, round back

SS2205

Polish or satin finish

Order Code: GCS-S-RB-P (Polish) GCS-S-RB-S (Satin)

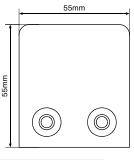

- · Slimline 45x45mm shape Suits fixing to Ø50mm round posts
- Premium grade SS2205 in polish or satin finish
- · Gaskets included to suit 8mm or 10mm glass only (not suited to 12mm glass)
- · Gaskets made from EPDM highest quality gaskets available

• Tighten or loosen Ø38mm & Ø50mm standoffs

A versatile tool that allows for easy installation of 38mm and 50mm diameter standoffs. Simply rotate the tool to suit the standoff diameter size.

Soudafix CA1400 Chemical anchor

280mL

Order Code: SOUD-CA1400

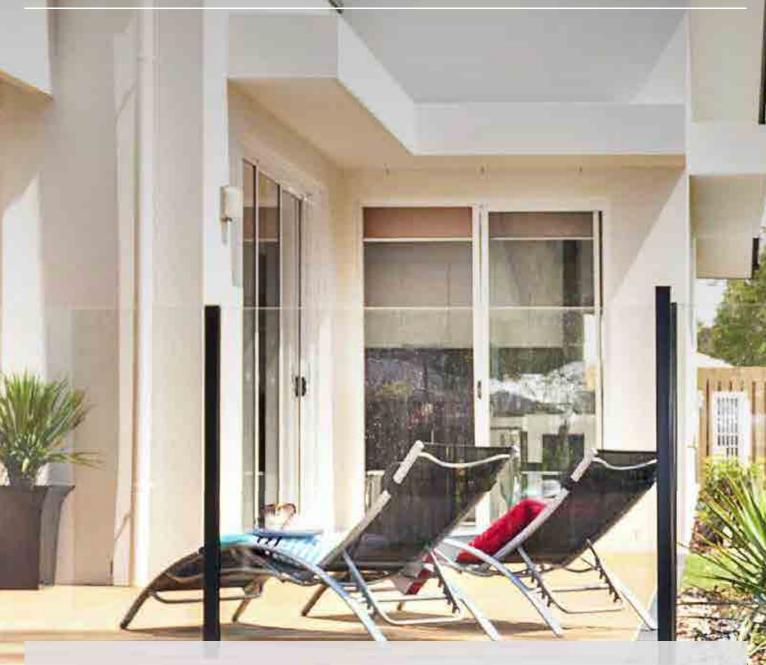

- · High performance, two-component chemical anchoring resin for the pressure-free securing of anchoring rods, studs, treaded collars etc
- · Easy to use and apply
- · Fast cure (20°C=45min full cure; 30°C=25min full cure)
- · Vinylester styrene free
- Can be used in damp concrete
- Apply with standard caulking gun

M12 thread

Order Code:

GS115LAG

SEMI FRAMELESS POOL FENCING

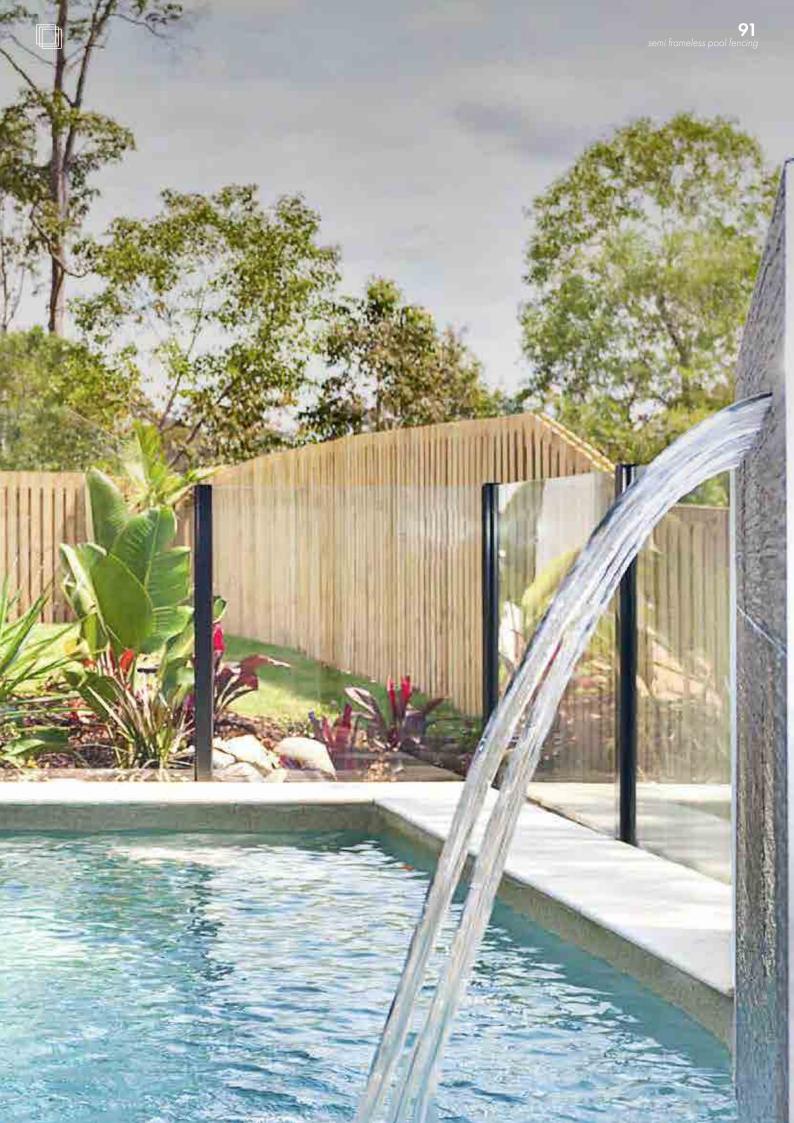

Semi frameless glass is a stylish and cost effective solution for pool fencing.

We have an extensive range of 1200mm high, 12mm thick clear toughened glass panels in incremental spans. Coupled with the Australis aluminium 50mm square post range and our modular glass gates, a visually stunning semi-frameless pool fence project can be easily completed.

The Australis aluminium range features a captive wedge glazing system which enables fast installation. Only one side of the glass requires glazing as the other side of the post has a simple slide in captive wedge which is inserted before the glass is lowered into position. Deep glazing pockets in the posts enable extra adjustment when installing panels.

Traditionally 10mm thick toughened glass was used with semi-frameless posts. Due to increased popularity and range of 12mm thick glass panels (particularly for frameless glass), commonly 12mm thick toughened panels are now also used in semi-frameless installations.

Our semi-frameless system offers the highest quality products while ensuring the fastest and easiest installation possible.

12 MM SEMI FRAMELESS PANELS

Our large range of 12mm thick clear toughened glass pool panels allows you to select an installation configuration to cover nearly all semi frameless situations

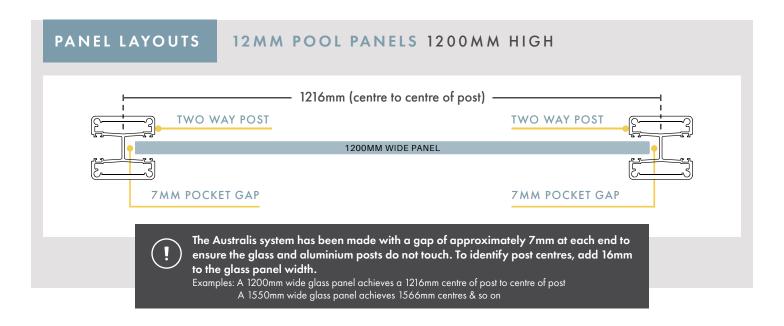

50mm increments from 200mm to 2000mm

Panels are produced under strict quality conformance requirements which has led to recognition of us as the industry leading supplier

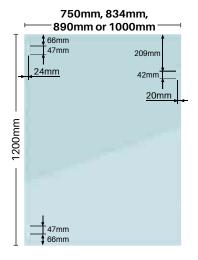

Available in 50mm increments from 200mm to 2000mm wide

Images & drawings are not to scale

The glazing pockets are deep, allowing for flexibility of installation

For example, the 1 way post glazing pocket is 28mm deep.

Captive wedge glazing system incorporated

Allows for increased speed of installation by requiring only the inner glass face to be manually alazed.

Screw flutes in glazing posts

Screw flutes strategically incorporated into the glazing post enable a range of installation advantages such as being able to screw fix a handrail, screw-fix base plates for pool fencing installation & enable top caps to be pressed securely in place to name a few key advantages. The Australis system with screw flutes minimises need for welding. Pre-welded base plated posts are available for fast assembly.

Standards Compliance for Pool Fencing and Balustrade

We have undertaken engineering review to ensure compliance to load considerations are satisfied.

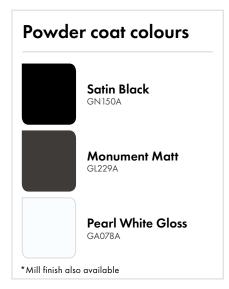

Genuine Interpon Powder used

Genuine Interpon powder is used with Interpon manufacturer warranties provided.

ISO 9001 accredited industry leading extrusion manufacturing factory

These are guidelines that provide a comprehensive model for quality management systems with the objective to consistently produce top quality products.

A50-P41/22-10PK (10 pack – 1300m lengths)

- Rubber glazed into 1 side of post extrusion pocket and/or glazing rail (opposite side to captive wedge rubber)
- · Suits 12mm glass with Australis series

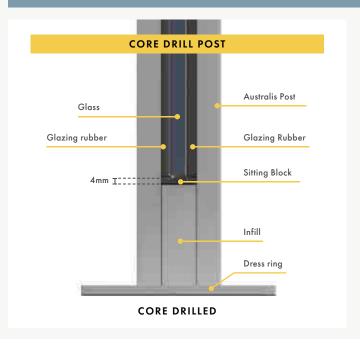

Yellow captive glazing rubber

Order Codes: A50-CAP-YEL-ROLL (100m roll)
A50-CAP-YEL-10PK (10 pack – 1300m lengths)

- Captive wedge rubber inserted into 1 side of post extrusion pocket and/or glazing rail
- Suits 8mm, 10mm or 12mm glass with Australis series

INFILL & SITTING BLOCK PLACEMENT

GATE INSTALL TIPS

GATE HINGED FROM STAND ALONE POINT

Due to the weight of the glass gate it is not recommended for a gate to be hinged from a stand alone aluminium post. A glass panel at least 400mm wide is recommended to be attached to the hinge post to give the post the support it needs.

Alternatively, use a stainless steel heavy duty post for a stand alone gate post installation.

Order Code: SQ50-BP-P/S

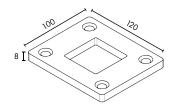

- 8mm thick base plate
- · Weld on base plate suits SQ50 post

SATIN

SQ50 ACCESSORIES

Oblong flange

SS316

Code: SQ50-OBP-P/S

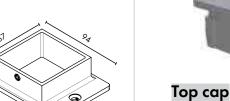

- Use as a wall plate
- 25mm deep throat gives flexibility for install
 Internal grub screws hold square tube in place or mechanically fix/weld oblong flange to tube

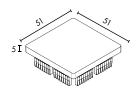

SATIN

SS316

Code: SQ50-HDTC-P/S/B

- Finish a post with the matching top cap
- Epoxy, weld or rivet cap to post

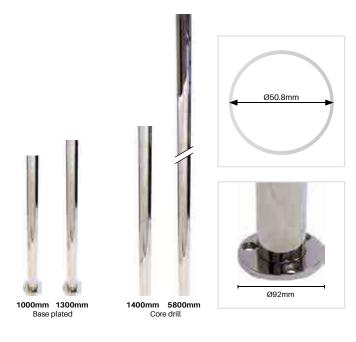

MOD50 ROUND POSTS

Ø50.8mm MOD50 posts & tube

SS316L - various lengths

Polish finish

Order Code: MOD50-1000-BP-P (Polish – Base plated)

MOD50-1300-BPSET-P (Polish – Base plated)

MOD50-1400-P (Polish – Core drill)

MOD50-5800C-50D-P (Polish – Core drill)

- Welded base plated posts available in 1000mm and 1300mm high
- Core drill posts available in 1400mm and 5800mm high
- 1.5mm wall thickness
- · Stainless steel 316L low carbon stainless steel

MOD50 heavy duty posts – Ø50.8mm

SS316L - 2.7mm wall thickness - various lengths **Polish finish**

Order Code: MOD50-1300-BPSET-P (Polish - Base plated) MOD50-1400-HD-P (Polish - Core drill)

- · Welded base plated posts available in 1300mm high
- · Core drill posts available in 1400mm & 2800mm high
- · Heavy duty 2.7mm wall thickness
- · Stainless steel 316L low carbon stainless steel

Ideal for hanging stand alone gates

Refer to our balustrade systems catalogue for a full list of modular fittings to suit Ø50.8mm stainless tube

MOD50 COMPONENTS

MOD50 domed end cap

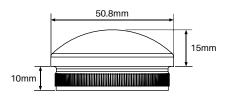

SS316

Polish finish

Order Code: MOD50-ECD-P (Polish)

- Domed end cap easy to use tap-in fitting
- Suits 1.5mm wall thickness MOD50 tube/posts
- Epoxy glue, weld or rivet tube for joining strength

MOD50 flat end cap

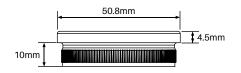

SS316

Polish finish

Order Code: MOD50-ECF-P (Polish)

- Flat end cap easy to use tap-in fitting
- Suits 1.5mm wall thickness MOD50 tube/posts
- Epoxy glue, weld or rivet tube for joining strength

MOD50 heavy duty top cap

SS316

Polish finish

Order Code: MOD50-HDTC-P (Polish)

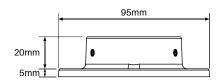

- Top cap to suit 50.8mm tube with 2.7mm wall thickness
- Suits MOD50 heavy duty posts
- · Epoxy glue, weld or rivet tube for joining strength

MOD50 base plate flange

SS316

Polish finish

Order Code: MOD50-BPF-R-P (Polish)

- Round external fitting flange
- 3x Ø6.5mm holes (with 3x Ø11mm CSK holes on top)
- Suits MOD50 posts
- Weld or drill/tap tube for joining strength

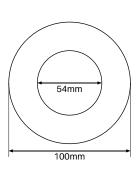

MOD50 dress ring

SS316

Polish finish

Order Code: MOD50-DR-P (Polish)

- Suits MOD50 posts
- Ø54mm inner opening, Ø100mm outer

MOD50 COMPONENTS

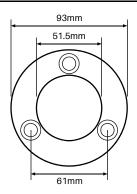

MOD50 base plate

SS316

Polish finish

Order Code: MOD50-BP-P (Polish)

- Round base plate Ø93mm outer
- 3x Ø11mm holes (with 3x Ø16mm CSK holes on top)
- 8mm thick
- Suits welding to MOD50 posts

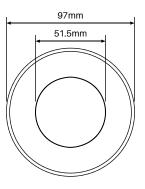

MOD50 domical cover

SS316 Polish finish

Order Code: MOD50-DC-P (Polish)

M8 blind rivet nut

SOLD INDIVIDUALLY Order Code: MOD-M8-BRN

- · SS304
- Threaded inserts for affixing D clamps to posts with 0.5mm to 3mm wall thicknesses
- Insert & crimp using hand rivet nut tool

M8 x 20 cap screw

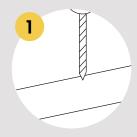

SOLD INDIVIDUALLY Order Code: MOD-M8-CS

- SS304
- Use with blind rivet nut to affix glass clamp to post

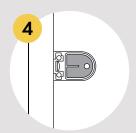

- · Allows quick insertion of stainless rivet nuts into posts
- Push/pull rod for quick thread insert and release
- Includes M4, M5, M6, M8 & M10 mandrel set
- Adjustable stroke for different wall thickness on posts (0.5mm to 3mm)
- Spare M8 mandrel also available Sold separately

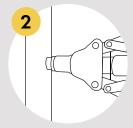

Install guide for D clamps

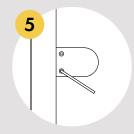

Drill hole in post
Mark out & drill holes to suit
diameter of blind rivet nut

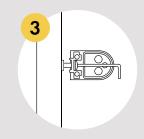

Insert rubber gaskets
Place the rubber gaskets onto both
halves of the D clamp

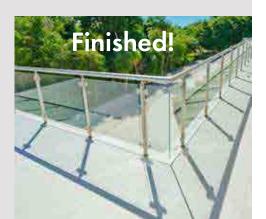

Install the blind rivet nut
Using the rivet hand tool

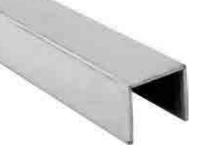

Insert glass & tighten
Place glass into position and tighten the
second half of D clamp

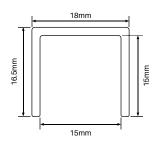

Install the D clamp onto post
Screw the cap head screw into the blind rivet
nut through D clamp

18x16.5mm Summit capping rail

SS316L - 3000mm long

Polish or satin finish

Order Code: STG-U3000-1515-P (Polish) STG-U3000-1515-S (Satin)

- 15x15mm glazing pocket
- Ideal for capping on top of glass to protect top edge or to brace panels together
- · Adhere rail to glass with glazing silicone
- · Not balustrade compliant

GLASS & STAINLESS STEEL CARE

Enduroshield glass treatment

125ml or 500mm ml bottle Order Code: ENDURO-GC-125 (125ml) ENDURO-GC-500 (500ml)

- Covers up to 8sqm with 125ml bottle or up to 32sqm with 500ml bottle
- Water and oil repellent
- One application lasts 3+ years
- Kit includes pre-cleaner product & surface treatment
- · Cuts cleaning time by up to 90%

Kit includes:

125ml or 500ml Enduroshield glass home surface treatment EnduroClean pre-cleaner Fine steel wool Polishing cloth Step by step instructions 3 year limited warranty

Enduroshield stainless steel protective coating

60mL bottle

Order Code: ENDURO-SSC-60

- Internal surfaces: Covers up to 4sqm
- External surfaces: Covers up to 2sqm (2 coats required)
- · Water and oil repellent
- One application lasts 3+ years
- Kit includes pre-cleaner product
 & surface treatment
- Cuts cleaning time by up to 90%

Kit includes:

60mL Enduroshield protective coating 125mL EnduroClean pre-cleaner Microfiber cloth Polishing cloth Step by step instructions 3 year limited warranty

Enduroshield stainless steel restore

500mL bottle

Order Code: ENDURO-SSRES

- Specially formulated to remove corrosion and tea staining
- Prepares surface for Enduroshield protective coating
- Apply either directly to the stainless surface or to a damp cloth and wipe over surface with cloth
- Ensure application is with the grain of the stainless steel, not against it

Polaris grout

10kg bag Order Code: **GROUT-POL-10KG**

- · Non shrink grout
- Rapid setting
- · Aggregate free

Bostik HES grout

20kg bag Order Code: **GROUT-BOS**

Non shrink grout

Sika HES grout

20kg bag

Order Code: GROUT-SIKA

• Non shrink grout

Rapid set concrete

20kg bag

Order Code: GROUT-RSC

KWIKSET concrete

20kg bag

Order Code: GROUT-KWIKSET

Ultraloc Threadlocker 3242 compound

10ML BOTTLE

 Medium strength removable grade threadlocking compound for metal screws, nuts and fasteners from 6mm to 20mm in diameter

Order Code: ULTRALOC-3242

Vinyl wedge roller

 Ideal for rolling wedge rubber
 Order Code: VROLLER

Quick grip gloves

- One size fits all
- Pair of gloves
 Order Code: GLOVE
- *Not to be used in wet conditions

CPR sign

- Genuine Royal Life Saving QLD resuscitation chart
- Plastic coated
 Order Code: CPR

Bostik V60 Clear glazing silicone

300g

Order Code: FB-V60

- Translucent
- · Architectural grade high performance glazing silicone
- Neutral cure sealant
- Excellent adhesion and flexibility
- Seals water tight UV and weather resistant
- 25 year manufacturer's guarantee against cracking and crumbling when used in standard conditions and applications*
- Compatible substrates glass, steel, timber, concrete, ceramic, fibreglass, aluminium (powder coated surfaces are limited)

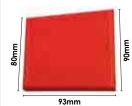

Soudal Epofix 82A

24ml

Order Code: SOUD-EPOFIX

- 24mL bottle easy to use dual cartridge
- Translucent fast curing 2 part epoxy
- Very strong bonding of many types of materials. Including metal, wood, glass and plastics

Silicone Spatula

Medium flexibility
Order Code: P-SS

- · Handy tool for glazing panels with silicone
- Made from thermoplastic polyurethane good elasticity and resistant to oils, grease & abrasion
- One corner features radius (R4) for neat silicone finishing

Soudal silicone

TRANSLUCENT - 300mL Order Code: SOUD-KBS-TRANS

- Translucent finish
- High quality, neutral cure silicone
- · Easy to smooth & finish
- · For sealing, waterproofing and bonding applications
- Contains mould & mildew inhibitors
- · Colourfast and UV resistant
- · Strong adhesion to glass, tile, ceramics, aluminium, metals (including powder-coated & anodised), painted surfaces, fibreglass, stainless steel
- Use standard caulking gun

Soudal silicone

WHITE - 300mL

Order Code: SOUD-KBS-W

- White finish
- · High quality, neutral cure silicone
- · Easy to smooth & finish
- · For sealing, waterproofing and bonding applications
- Contains mould & mildew inhibitors
- Colourfast and UV resistant
- · Strong adhesion to glass, tile, ceramics, aluminium, metals (including powder-coated & anodised), painted surfaces, fibreglass, stainless steel
- · Use standard caulking gun

Soudal all purpose silicone

300mL

Order Code: SOUD-APS-B

- Black finish
- · High quality, neutral cure silicone
- Ultimate all rounder silicone (roof/ gutter, kitchen/bathroom, glass/ glazing)
- · Sealing, waterproofing & bonding applications
- Strong adhesion to ceramics, glass, aluminium (including powder coated & anodised), PVC, stainless steel, zinc & galvanised coated surfaces, timber, concrete, fibreglass, laminate, painted surfaces, etc
- UV resistant with very good mould resistance (biocide with fungicidal action)
- · Water potable & food safe
- · Use standard caulking gun

Soudafix CA1400 Chemical anchor

280mL

Order Code: SOUD-CA1400

- · High performance, two-component chemical anchoring resin for the pressure-free securing of anchoring rods, studs, treaded collars etc
- · Easy to use and apply
- · Fast cure (20°C=45min full cure; 30°C=25min full cure)
- · Vinvlester styrene free
- Can be used in damp concrete
- · Apply with standard caulking gun

Soudal heavy duty cartridge gun

- · Heavy duty, streel trade quality cartridge gun
- and easy application
- Dripless system feature automatically releases pressure to reduce mess/waste
- Suits 300ml silicone cartridges and 280ml chemical anchor

D&D Premium lockable drop bolt

Black finish

Order Code: LB-PL

D&D code: LL118BX-LA

- 316 marine-grade stainless steel drop-rod
- Tough polymer-housing mounting system
- 6-pin lock (rekeyable to match doors & gate locks)

Ø14mm

Black finish

Order Code: QB124

D&D code: QB124

- · Powder coated black, stainless steel drop-bolt
- · Padlockable (*Padlock not included)
- · Tough, moulded polymer mounting system

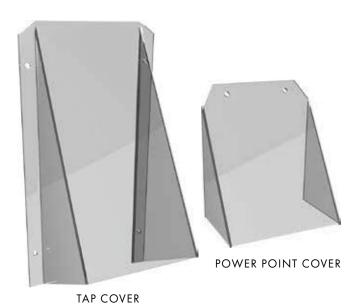

300mm drop bolt

Black or zinc plated finish Order Code: SS-0300DB-B/ZP

- · Ideal for driveway gates
- · Cost effective drop bolt
- · Easy to install

Toe hold prevention covers

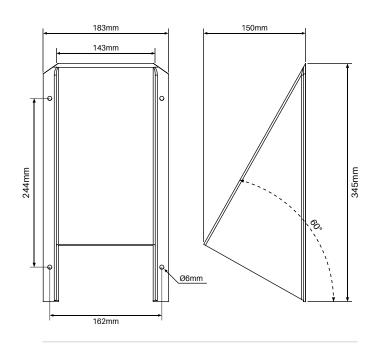

THERMOPLASTIC

Transparent finish

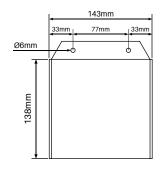

Order Code: COVER-POWER (Power point cover)
COVER-TAP (Tap cover)

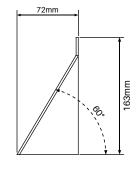

- · Transparent thermoplastic
- Cover features 60 degree angle to prevent a toe hold
- Ideal solution if tap or power point considered a step point
- Resistant to impact & chemicals
- Power point cover comes with 2 x predrilled fixing hole Includes 2 x SS316 screws (ST5x40mm) & 2 x wall plugs
- Tap cover comes with 4 x predrilled fixing hole Includes 4 x SS316 screws (ST5x40mm) & 4 x wall plugs

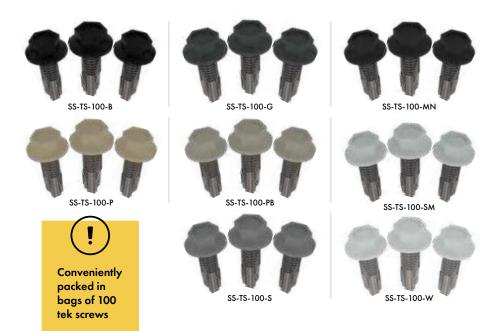

TAP COVER SPECIFICATION

POWER POINT COVER SPECIFICATION

Self drilling tek screws

12Gx20mm – BAG OF 100 Black, woodland grey, monument, primrose, paperbark, silver, surfmist & white

Order Code: SS-TS-100-B (Black)

SS-TS-100-G (Woodland grey) SS-TS-100-MN (Monument) SS-TS-100-P (Primrose)

SS-TS-100-PB (Paperbark) SS-TS-100-S (Silver)

SS-TS-100-SM (Surfmist) SS-TS-100-W (White)

- Self drilling tek screw featuring integrated thread and drill/cutting tip
- 12G x 20mm tek screw with hex head
- Used in a variety of aluminium fencing applications
- Packed in convenient bags of 100 screws
- Available in a variety of powder coated head finishes - thread and tip not powder coated to ensure proper threading/cutting

Post plugs

4 PACK

Order code: SS-POSTPLUG-4PK

SS-POSTPLUG-4PK-W (White)

- Ø32mm outer top suits 25mm hole
- · Ideal for covering hole in post when affixing post to wall with inner fixing
- · Suits post wall thickness 1.5mm 3.2mm

Drill a 25mm diameter hole through front wall of post

Drill rear wall of post with required diameter for fixing and then fix post to wall. Insert appropriate fixing into the wall for affixing post

Once post is fixed to wall with appropriate fixing method, insert post plug to cover the post hole.

Repeat the process as required

Touch up paint

150g SPRAY CAN
Black / Monument / Woodland grey
Silver / Surfmist / White / Basalt / Dune

Order Code:

PAINT-B/G/MN/S/SM/W/BS/D

- Colour match touch up paint
- Simply spray on for minor touch ups

Self drilling wafer screws

10Gx16mm - BAG OF 100
Black / Monument / Woodland grey
Silver / Surfmist / White / Basalt
Dune / Mill finish

Order Code: XP-SCREWS

- Bags of 100 10G x 16mm self drilling wafer head zinc plated
- · Powder coated heads for neat finish
- Self drilling screws can be used in a variety of install applications

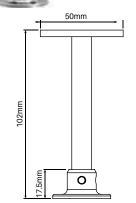

100mm support foot

HEIGHT ADJUSTABLE **SS316 / POLISH FINISH**

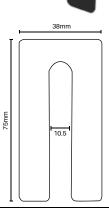

Order Code: XP-FOOT-ADJ

- Height adjustable support foot
- Easily height adjustable (from 25mm up to 100mm) – stainless steel stem can be cut down and bottom flange reattached with grub screw
- Handy foot for supporting products that have a wide span

Horseshoe Packers

Black finish

Order Code: HSP-75X38-1MM-20PK

1 mm thick - Pack of 20

HSP-75X38-3MM-20PK

3mm thick - Pack of 20

HSP-75X38-10MM-5PK

10mm thick – Pack of 5

- 38mm wide x 75mm long horseshoe packers
- 10.5mm slot
- Available in 1mm or 3mm thick (20 per pack)
- Available in 10mm thick (5 per pack)
- Durable black solid polypropylene
- Handy for levelling adjustments while installing
- Easy to cut down to required length

Available 1mm, 3mm or 10mm thick

We offer a range of stainless steel 316 M10 and M12 fixings perfect for affixing spigots, wall plates, standoffs, rigi and glass clamps

M10 FIXINGS

Counter sunk timber screw – 4 pack

100MM LONG - \$\$316

(Hex head drive)

Order Code: CSK-100-4PK

- Heavy duty self tapping screw 100mm long with M10 thread -Ø18mm outer head
- Hex head drive
- · Ideal for fixing base plated spigots to timber deck
- Countersunk head allows screw to finish flush with top edge of base plate for neat finish

SS316

- Use if base plating to timber substrate
- Ensure timber substrate is suitable for fixing to
- Sold as single screw

Order Code: S-120COACH

Timber fixing kit

4 PACK - SS316 Order Code: **S-110LAG-4PK**

- M10 x 110mm timber lag screws x4 with nuts and washers
- Nuts fit under high domical covers.
 Fixing kit cannot be used with slimline covers (slimline covers use countersunk fixings)
- Nut is 8mm thick

Concrete fixing kit

4 PACK - SS316 Order Code: S-120ROD-4PK

- M10 x 120mm concrete threaded rods x4 with nuts and washers
- Nuts fit under high domical covers.
 Fixing kit cannot be used with slimline covers (slimline covers use countersunk fixings)
- Nut is 8mm thick

BATTEN SCREWS

50mm CSK batten screw

SS316 14 gauge Order Code: CSK-050

batten screw

14 gauge Order Code: CSK-075

M12 dome nut

PACK OF 4 – SS316 **Black or Silver finish**

Order Code: GS-DN-4PK (Silver) GS-DN-4PK-B (Black)

- 4x dome nuts & 4x split washers
- Suits M12 thread

M12 FIXINGS

93mm lag screw

SS304 M12 thread Order Code: GS093LAG

115mm lag screw

SS304 M12 thread Order Code: GS115LAG

160mm lag

SS304 M12 thread Order Code: GS160LAG

120mm threaded rod \$\$304

M 12 thread Order Code: GS120ROD

1000mm threaded rod \$\$304

SS304 M12 thread Order Code: GS1000ROD

DIAMOND REVOLUTION DRILL

Diamond revolution drill

Core drill

Order Code: REV-CD-2S • 2 speed core drill - 1500W

- · Comes with case, allen key, spare set of brushes and manual
- · Safety switch
- Uses common size 1 1/4" UNC male thread for diamond core bits

Technical data Voltage: 240V Rated frequency: 50-60Hz Rated input power: 1500W No load speed r/min: 2100/950 Weight: 8.8kg

Diamond revolution stand

Suits diamond revolution core drill Order Code: REV-STAND

- · Steel and aluminium construction
- · Height: 800mm
- Base: 330mm x 380mm
- · Weight: 12.6kg

Core drill template

Order Code: REV-TEMPLATE

- · Assists with starting to core drill hole
- · Stabilises the drill bit from jumping

Spirit level for core drill

Order Code: REV-LEVEL

- · Screws into core drill machine
- · Assists with drilling accurate holes

Splash guard/ water trap

Order Code: REV-GUARD

Base for stand

Order Code: REV-BASE

· 550mm x 550mm overall dimensions

Core drill bits Mild steel body & diamond impregnated crown tip

8mm mini core drill bit

Order Code: REV-BIT-08

53mm core drill bit

53mm x 450mm long Order Code: REV-BIT-53

10mm mini core drill bit

Order Code: REV-BIT-10

63mm core drill bit

63mm x 450mm long Order Code: REV-BIT-63

12mm mini core drill bit

Order Code: REV-BIT-12

76mm core drill bit

76mm x 450mm long Order Code: REV-BIT-76

14mm mini core drill bit

Order Code: REV-BIT-14

83mm core drill bit

83mm x 450mm long Order Code: REV-BIT-83

20mm mini core drill bit

Order Code: REV-BIT-20

89mm core drill bit

89mm x 450mm long Order Code: REV-BIT-89

A-FRAME TROLLEY

A-Frame trolley with removable caster wheels

Includes caster wheels & ratchet straps
Order Code: TROLLEY-FP (Flat pack)

- A frame is manufactured to comply with Australian standards
- · 4x removable heavy duty caster wheels included
- Rated to 1600kg safe working load
- Rubber profiles, ratchet straps & retaining straps included
- Entire frame is hot-dip galvanised
- Forklift onto utes & trailers
- · Forklift compatible from all four sides
- Ideal for transporting and storing glass, stone and other materials within the factory/warehouse
- 1100mm wide x 1808mm long x 1700mm high

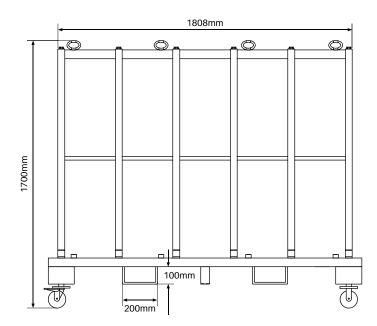

Remove wheels and lift with a forklift onto back of ute

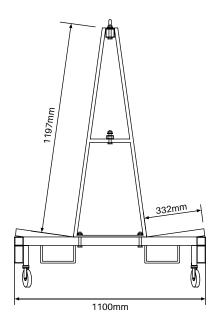

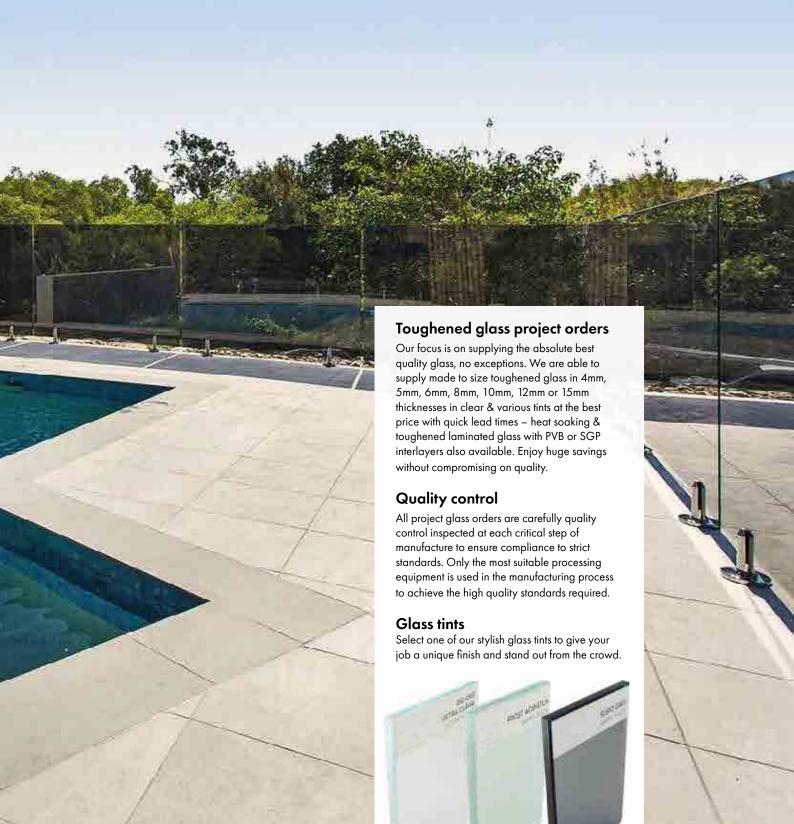

Available in all our depots: South East Queensland, Melbourne, Adelaide, Newcastle & Perth

Flat Pack ready to be assembled 3 boxes with assembly instructions

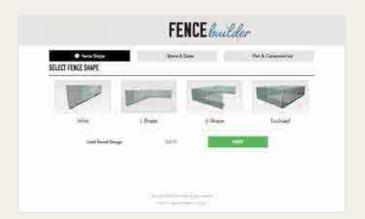

FENCEbuilder
