

alumawall

Stackable sleeper

An extruded aluminium stackable sleeper designed to be used under steel panel fences or as a retaining wall sleeper.

- › Sturdy aluminium design with high quality powder coat finish
- › Fits neatly into 'C' section posts of common steel panel fencing brands
- › Perfect for preventing weeds or debris from protruding through gaps in fence
- › Can also be used to level or increase the base height of the fence
- › 2385mm long x 150mm high x 50mm wide – check your 'C' section posts to ensure correct fitting
- › Easy width adjustment – simply cut to desired width
- › Specially designed heavy duty post available for retaining wall installations
- › Sleeper comes with two free black nylon end caps

Easily stackable!
